Margins too tight
ONFIELD TEAM AND TEAM USA SHIELD

U.S. Olympic Team mark and available colors

Exclusion Zone
Margin space too tight
Minimum size: 0.6" or 54px

U.S. Paralympic Team mark and available colors

Team USA Shield mark and available colors

Exclusion Zone
Margin space too tight
Minimum size: 0.25" or 30px
MARKS USAGE STANDARDS

Usage Standards

When applying the USOPC marks to background images and textures, use the rules shown on this page to determine appropriate usage.

To ensure the visibility of the USOPC marks for tone-on-tone applications, the monochrome marks must have sufficient contrast against the background used—minimum 50% in value. The only exception to this 50% contrast rule is when the marks are etched on glass or applied as a watermark on pictures or videos. Transparency is also acceptable in some very specific cases such as white TV bugs with 60% transparency.

ALL MARKS

The USOPC marks must always be visible in their entirety and should never be cropped or distorted in any way. If a situation occurs that is not defined on this page, ensure that the mark maintains sufficient contrast and legibility.

The rules defined on this page are applicable to all marks in the USOPC identities suite.

NOTE: These examples are not exhaustive.
REQUEST PROCESS

Any and all uses of Olympic and Paralympic Marks, Terminology and Imagery must receive prior written approval by the USOPP or USOPC. The following matrix outlines the relevant approval parties. Please check your USOPC Marks Rights Agreement or Policy for your Marks rights.
