

Large Broom

Submitted by: Paul Ellarby, Dakota Curling Club

I made the broom out of 1" PVC pipe, a 1" x 4" x 8' piece of lumber, and two 4' commercial mops from Uline (uline.com). Total cost - less than \$20.00

Variation - to get the frost off the ice after dry cut zamboni runs, use a large broom with a brush head before pebbling- home made if you want the longer broom span.
