4. Will the Team USA suits be the same as worn by the U.S. Olympians/Paralympians and elite athletes?

Yes, the new suits will be worn by all Team USA athletes, as well as elite and para elite athletes competing in World Triathlon events. Age Group athletes are able to order Team USA elite suits as well as an Age Group specific kit.

5. What are the key differences between the Elite Collection and Age Group Collection?

Zone3's Age Group Collection is designed to provide a supportive performance fit, without being too compressive and has been based on previously designed award-winning product from the brand.

Made using a combination of Italian fabrics to provide coverage, support, breathability and comfort, the Age Group Collection also has a full water repellent coating to reduce drag through the water and reduce fabric absorption, designed to create less weight and reduce drying time.

With laser cut and heat bonded front chest and shoulder seams, super-soft Italian leg grippers, and a triathlon specific pad, this collection has been created with industry-leading technology with the athlete at the forefront of the design process. Our Age Group suits come with two gel pockets.

Zone3's Elite Collection has been designed in-line with the World's fastest aero tri suit, the Aeroforce X, created by Zone3 in 2020. The collection offers a more supportive, compressive fit designed for ultimate speed, which is lighter, more breathable and has a lower water absorbent property.

With fully bonded front panels, full water repellent coating, silicone grippers and modesty double linings on both the men's and women's collection, the Elite Collection has been designed for athletes who want to push further and harder than ever before.
