Have You Ever Seen the Kind of Bruise a 180 mph Serve Can Leave, On Your Ego?

“Nice Serve Cliff!”
[Wow!]

“Nice Serve Cliff!”
[Was that a serve or a missile?]

“Nice Serve Cliff!”
[Had to be a visceral serve!]

“Nice Serve Cliff!”
[Maybe the video caught it?]

“Nice Serve Cliff!”
[This is getting old fast!]

“Nice Serve Cliff!”
[Okay, I’m just gonna guess!]

“Nice Serve Cliff.”
[Guess again!]

“Nice Serve Cliff.”
[Her got a piece!]

“Nice Serve Cliff.”
[This stinks!]

“Nice Serve Cliff.”
[Indeed!]

“Nice Serve Cliff.”
[Great, I killed one back!]

“Nice Serve Cliff.”
[This just eats the big one!]

“Nice Serve Cliff.”
[I’m not even gonna get to serve!]

“Nice game Mr. Swain.”
[Jack!]

CLIFF SWAIN
Leave an Impression. The “G” Series and The New Pyramid Series from Head.

The Head 176 “G” is one of six racquets in the “G” Series. Arguably, six of the lightest most powerful racquets you can find anywhere in the world today. And that is precisely why Cliff Swain plays with one. With shots that alternate between serves in excess of 180 mph to lightning fast slabs at volleys, he needs a racquet that is super quick, and super powerful. After all if you’re going to stay at the top you have to dish it out a lot faster than it gets served up.

And this year Head Racquetball introduces a whole new generation of high performance racquets called The Pyramid Series. Six exciting new frames that incorporate our Revolutionary New Pyramid Technology. This dynamic new racquet construction transfers more power directly to the ball than most conventional frame designs. Giving you the extra edge on the competition.

The “G” Series and The Pyramid Series. The New Power From Head!
Just in case any of you were wondering if there were any method to this madness, I thought you might like an inside look at our last-minute countdown to this issue...

I've typed this editorial directly into the layout program (I've given it just that much thought) since the disk is already overdue at its pre-press destination across town. (No, I don't necessarily go from front to back – so what if this is on the first page?!) I'm suspected of being too sensitive about my editorial, since no one gets to see it beforehand but, in truth, it's just that I procrastinate with the best of them...

It's Monday and I'm due at national doubles in Phoenix bright and early tomorrow. But first this issue had to be “put to bed,” so this past weekend was filled with countless, quiet hours parked before the PC-temple, silently dreading “application error” messages from the ROM gods.

Before that, overcome with the desire to make changes, I toyed with some design suggestions that I just had to incorporate right away. So, those took a little while to get up and running. Then, there were those extra eight pages we added to this issue...

Yep. Bigger, better, more demanding and complicated each time we go to press – that's our aim. But at least it's kept my mind off the holidays (approaching like a runaway train) and kept me from offering up my standard, maudlin reflection of yet another year gone by (traditionally seen in this space).

Still, there's time and room to at least slip in an abbreviated version of my favorite reminders:

- Use this gift-giving season as an excuse to buy prescription eyeguards for your near- or farsighted loved-ones, and...
- Please remember to thank our advertisers with your support in '96, since they truly make each issue of RACQUETBALL Magazine possible, and...
- Accept our very best wishes for your peace, prosperity, good health and great racquetball – all throughout the year!

The disk has left the building...

ON THE COVER
A sketch by Kevin Cordtz shows what you might be likely to strain, pull, wrench, or otherewise injure on the racquetball court, to illustrate our feature story “Playing Hurt” by Dr. Rhett Rainey (on page 8).
FAULT FINDING
In this spring's edition of KILLSHOT magazine Aaron Katz stated that "The AARA certainly has to bear some of the burden" for the problems of "grass roots" racquetball. He maintains that the AARA incorrectly focuses on the "Olympic picture" at the expense of involving itself with the local clubs.

It is my feeling that the AARA needs to continue pursuing the "Olympic picture" to provide opportunities for advanced players. The fantastic job the AARA does with its adult and junior national teams spreads racquetball throughout the planet! Also, the "Olympic picture" will expand the perception of racquetball to the general public and media as it has done for other sports.

I believe that changes at the "grass roots" should and must come from those of us who play the game, compete in tournaments and now have children old enough to play. If ten percent of today's players took their children to compete in tournaments, organized junior playdays, etc. the debate over responsibility for growth in racquetball would become a moot point.

Each individual player needs to take the time to introduce this game to their children. I realize that kids today have a variety of sports opportunities. This is not a situation, however, where children need to choose between commitments. Introduce your child to racquetball. Fit it into his/her life and yours. They will then have background in a sport that they can pursue for the rest of their adult lives. Racquetball will grow when parents take the time to introduce their children to this great sport!

Harvey Brannigan
Sagle, Idaho

HAwAIAN TRIBUTE
Wish I'd thought of sending you the attached clipping sooner, but it wasn't until I saw your magazine at the house that it occurred to me. This is a story that's got to be told, both for the sport and for the human interest. It's one I'm not good enough a writer to tell, but a quick read of the latest issue shows you've got plenty of talent around.

Mr Ho, the only way my son Ben ever called him, died a couple of months ago just days before another of his successful tournaments began. Along with a buddy who talked Ben into coming to the court, Mr. Ho had the biggest influence on making a gym jock out of what had been, pretty much, a couch potato.

While no longer a player myself (back and elbow injuries), I occasionally came to the gym and saw Mr. Ho on a court, usually with children from five to fifteen, patiently teaching them the game the right way from the start. He was a warm-hearted gentleman in every sense of the word who left us much too soon.

Please assign one of your writers to do an article on this man. His influence on Hawaiian racquetball is immense.

(And by the way, I'm not sure I saw the word "Hawaii" anywhere in your last issue. Yet our courts at the Schofield Barracks Fitness Center are often used for statewide tournaments and I've seen some unbelievable players here. As we might say, How cum nutting?)

Steve Kohn
Wahiawa, HI

[Ed: This is the first letter we’ve received from Hawaii in quite some time, and we’d love to hear more — so feel free to keep us informed about racquetball on the Emerald Isle... Unfortunately, we were unable to obtain permission to reprint the article about Mr. Ho, but his picture is printed below, courtesy of Mr. Kohn]
WHERE YOU PLAY IS STILL 20X40. BUT HOW YOU PLAY HAS CHANGED FOREVER.

**STRIKE ZONE™**
Explosive power in the top third of the racquet, where tournament players hit 70% of their shots.

**AIR HAMMER™**
Quick, driving power and maneuverability in an ultralite, head-heavy racquet.

**RADIUS™ with POWER BRAID™**
A coil of pure energy delivers effortless power and pinpoint accuracy.

You’ve personalized your style of play. We’ve personalized a racquet to match it.

*Wilson™* Racquetball
The Right Equipment Makes The Difference.”
Look down the throat of the most powerful new technology in racquetball.

New 16.2" LongString™ Racquets

Chaos 190g
Longstring technology for players who increase power with a faster swing.

Havoc 230g
Longstring technology for players who increase power by putting more mass into the ball.

Revolutionary LongString Concept
Longest racquet face (16.2") and mainstrings (16.0") in racquetball. Unique throat design, handle and Tri-Taper Frame enable E-Force to lengthen mainstrings from 1.5" to 3" more than competitors racquets—generates ripping new power.

More Power from Longer Mainstrings and Racquet Face
For the same effort, longer mainstrings and racquet face give you more power. It's the same principle as the bow and arrow.

Stiffness is customized throughout the frame to control and release the awesome power of Havoc and Chaos.

Don’t Come Up Short
Get more mainstring for your money. Get in-your-face down-your-throat power with 16.2" LongString technology.

E-Force Carbon/Power Series

**Aggro**
E-Force’s stiffest racquet—190 grams
total power weapon, for aggressive players who sacrifice all for maximum power. There’s nothing else like it in racquetball.

**Thruster**
Awesome power with shock-absorbing comfort—190 grams
stiff graphite with vibration-damping thermoplastic polymers. Easy on the elbow, arm and shoulder.

**Hyperlite 160g**
Racquetball’s lightest racquet—160 grams
tremendous power with rapid response
and lightning-fast head speed. 1” head heavy to increase swing weight.

Intimidating power—that’s what racquetball is all about, and the E-Force Carbon/Power series gives you three specialized ways to get it. Humble your next opponent, with the power of E-Force. Demand E-Force at your club or dealer.

---

Egan Inoue,
E-Force founder, world champion and power serve record holder.

---

Look up to E-Force for specialized racquets with in-your-face power.

PLAYING HURT

By Rhett K. Rainey, D.O.
Team Physician U.S. National Racquetball Team
Why do some athletes play when injured, while others choose not to? What are the motivations and reasons for human beings to participate in sport while ailing? What are the differences between recreational, collegiate, and professional athletes? What are the psycho-social reasons athletes play injured? Answers to these questions may help us to understand people and what makes them tick...

A n advertisement for Cal Ripken’s batting glove struck a chord with me — “You see your name on the line-up card and you can hardly believe it. You realize that this is what all those games of pepper with your dad were for. So you play your first game, and your second, and third. You just keep playing them one at a time, running out every ground ball, enduring the foul tips off your instep and the boredom of the rainouts and the nagging bumps and bruises that come with playing the game hard, the way it was meant to be played. Suddenly, all those games you played one at a time add up to 2,131. Kids who weren’t even born the day the streak began want to be there the day you break the record. Your old teammates make plans to be there and your family, also. But the surest thing of all is that you’ll be there, after all, there’s a game that day.”

That pretty much sums up one man’s courage and love for the game. You can bet that over 13 years of playing baseball day in and day out, Cal Ripken played with injury.

By contrast, an article in the Sporting News in 1991 entitled “No Longer Playing Hurt” blames free agency, rich contracts, and softer athletes for mushrooming disabled lists. This article cites lack of incentive, lack of character, medical conservatism and lofty attitudes as reasons why baseball players with rich contracts stop playing hurt and opt to go on disabled lists. Many of today’s pro players may not push as hard because they don’t feel as vulnerable as in the past.

When I was asked to write this article, I thought for a while and decided how appropriate it was for me since I play hurt most of the time and I suspect a lot of other athletes do too. To prepare, I went to the medical library to do a literature search and found that virtually nothing has been written on this subject. So the question is an intriguing one. Why do we play hurt and what motivates us to do so?

For myself I have an unstable degenerative segment in my lumbar spine. My symptoms have been progressively worsening over the past six years. I have been able to play with pain until recently when my symptoms progressed to the point that my skills were deteriorating and the pain became unbearable. Sometimes when I played, my back and leg pain felt better and sometimes
Andy Roberts: Nobody knows this subject better than me. The mistake I made before surgery on my left knee was to play. It made my rehab longer and unbelievably hard. I never thought I’d make it through. I don’t know if it’ll ever be 100%. I work my leg out in some way every day – if I didn’t I couldn’t play at all. Racquetball is hard on the knees and back and I may have to have surgery again next summer. I’ve been playing racquetball since I was 12 and I just kept aggravating injuries. I should have had surgery right when my knee injury happened. When the swelling went down I had an MRI and continued to play – a whole second half of a season hurt. Now my right hip always hurts from over compensation during the injury and it took me one year from the date of the surgery to feel o.k. about the knee being strong enough to take the movement of playing racquetball.

The Knee

Knee injuries may occur in any racquet sport, but they are of particular concern in racquetball, in which nearly every type of knee injury can occur. The patellar pain syndrome may be the most frequently encountered condition in persons playing racquetball. The syndrome usually has an insidious onset and is characterized by dull, aching, poorly localized pain that occasionally radiates to the sides and back of the knee.

it would hurt. I recently underwent a lumbar fusion in an attempt to correct the problem.

I think at some time during our activities we all play with some degree of pain. But what is it that motivates us to play hurt and what do we as recreational athletes gain by doing so?

I remember an incident playing high school football when a player got a finger poked in his eye. He had tears running down his face and the coach came up and asked him if he was alright. The player responded by saying, “I’m OK coach, I only need one eye to see.” That struck me then as is does now. Why didn’t he let the coach know he was truly hurt? I think it is obvious that he didn’t want someone to take his place and become second string or he wanted the coach to think he was tough and could play hurt. Where do we draw the line when playing with little aches and pains and playing when there is a potential for serious or permanent damage?

Since thinking about playing hurt, I have run across several newspaper clippings that cite the practice. One from Sports Illustrated on Tony Gwynn’s pursuit of baseball’s batting crown stated that Gwynn was batting .337, even on an increasingly bad left wheel, playing for a typically mediocre San Diego team. His title, if properly protected, was in the bag. And because knee surgery was inevitable, his father suggested that, instead, Gwynn retire for the season. “Sit down and win your title.” Gwynn played on until, with 21 games remaining and his average down to .317, he finally surrendered to orthoscopic surgery. He tried to explain to his angry father that you can’t win a batting title like that.

A photo in SI showed a baseball player with protective tape covering his entire foot and ankle over his shoe, playing with a broken toe. A newspaper article cited that Greg Norman thinks the painful twinge in his back is no reason for concern, just a sign to slow down and take precautions. Another newspaper article entitled “Wyman

Robin Levine: I personally have a “never-say-die” attitude. I just keep trying and trying. And I just keep on hurting worse. Pain is the body’s way of telling you – hey, pay attention to me! We’re competing at a level where we try to compete no matter what. The hardest thing for me to do is not play. But I’m telling you, listen to your body and do what it’s telling you. Depending on your injury you might not be able to hit as hard or you might have to change your serve. You will have a more limited game. You have to play more mentally tough than you ever had. The only “good thing” I could say about playing through an injury is that you have to use your brain more because you can’t use your physical skills.
The Shoulder and Elbow

While the major swing action used in racquetball does not originate in the shoulder, the acromioclavicular joint is susceptible to a number of injuries. Most commonly, these injuries are traumatic in origin and are usually related to a fall or the impact of a wall. Under these circumstances, shoulder sprains and separations are the most common type of injuries.

Lateral epicondylitis, or tennis elbow, is probably the most common of all upper extremity injuries in racquetball players. The condition is easily diagnosed and nearly always self-limited. During the therapy period, the athlete should attempt to identify the cause of the injury. Often, poor technique or a faulty grip is the cause. Racquet type, size and string tension should be considered, especially if a change had been made just before the onset of symptoms.

works through pain in pursuit of a job” details how this Denver Bronco football player had 11 surgeries and was recently diagnosed as having tendonitis in his knee. He states, “I hurt pretty much all the time. I know I can still play, I just love to play. If I thought I was risking serious injury where I could be paralyzed, I wouldn’t do it.”

Yet another article entitled “Little Girls bordering on Abuse” investigated gymnasts and skaters pushed beyond their limits, in a story about legal, and even celebrated, child abuse. According to the article, in the dark troughs along the road to the Olympics lay the bodies of the girls who stumbled on the way, broken by the work, pressure and humiliation. What possesses kids and parents to go through this?

From my readings, I have found different motivations for the different classes of athletes. They are clearly not the same for recreational, versus collegiate, versus professional athletes. There are different types of motivations along the way that differentiates between these classes of athletes.

In a study of athletic injuries, 30% of the athletes examined stated that they suffered from permanent pain as a result of playing hurt during their careers in elite sports. An article on sports injuries stated that an increase in the popularity of physical exercise and sports participation was followed by an increase in athletic injuries. Still, it concluded that the benefits of exercise outweighed the hazards. An article on exercise, training and injuries documented numerous health benefits of physical exercise, but also a risk of exercise-related injuries. They concluded that greater duration and frequency of exercise were associated with higher risks of injury and in some instances may also impart no additional increase in fitness.

So, the first possible motivation? It has been shown that injured athletes exhibit greater depression and anxiety, along with lower self-esteem. Physically injured athletes experience a period of emotional distress that in

Mike Arnolt: Playing hurt, strange as it may seem, actually increases my focus. I acknowledge my limitations and am less inclined to create or force a shot. The only thing which cross my mind are being keenly aware of my opponent, gaining court position and proper shot selection.

Gary Mazaroff: If it’s not a life or death decision I’ll play. I may play left-handed. My sphere of influence may change radically but it’s worth it. You redefine what winning is.
Michelle Gould: The mind has a funny way of convincing you that your injury is not that serious. Motivation to play through injury comes from a fiery spirit and determination. You convince yourself that the injury isn’t too serious so you can keep playing. You have to admit to yourself that there are a few things you won’t be able to do, but not enough things to keep you from playing, and hopefully winning. No matter what, you don’t want to quit playing!

If I could bottle an answer to making changes in your game to play through an injury without making the injury worse I would be a millionaire!! I have found that it is important to realize what limitations exist, and try to stay within those limits. Easy to say, but incredibly difficult to do! I have played through many injuries during my competitive career and have found that if you have to play while you are injured, you must be very careful. Immediately after you are done playing, seek rehabilitation and take care of the injury as quickly as possible. Nagging ailments that never seem to go away are the worst. Take care of the injury, before the injury takes care of you!!

some cases may be severe enough to warrant clinical intervention. The inability of the athlete to cope with their injury causes fear, tension, fatigue, disbelief, depression, and somatic complaints. With all these negative factors it makes sense that playing hurt may be the lesser of two evils.

Another reason we play hurt is that we may think it is normal to play with some aches and pains. Normalizing sport injury refers to the process of defining even serious injuries in sport as routine and uneventful. While coaches and athletes typically become accustomed to witnessing pain and injury, others who are less accustomed to sport injury may react quite differently when exposed to such events.

The media frequently celebrate the willingness of an athlete to endure extreme amounts of pain and injury — to the point at which ignoring pain becomes defined as a type of positive deviance. Those who demonstrate the least amount of pain are then glorified or promoted as good examples. In this respect it becomes somewhat “macho” to play with pain.

There is a pervasive and peculiar acceptance of pain in sport manifested by the nickname “House of Pain” which fans of one professional football team gave their stadium. Also a peculiar remark by baseball manager Sparky Anderson who says, “pain don’t hurt.” This seems contradictory but merely expresses that pain is ever-present whenever athletes routinely push themselves to peak performance.

The pervasiveness of pain in sport reflects the inherent irrationality of sport. The athlete’s enjoyment of sport seems to transport them beyond typical considerations of physical

Dave Peck: I was in the semifinals at nationals when I was injured. At first I thought ‘This hurts, but can I play this out? I think so.’ To have a competitor going on (to the final) without beating me was not me. Back to back championships — that was my goal — so I think a combination of both those things kept me playing through the pain. As a child growing up, playing football and other sports, back then you were taught to suck it up. So I had surgery at 1 a.m., I was out in rehab for about six month and now it is a continuing injury. My knee and leg are messed up to this day. If I would have known how this was going to affect my career I would have just not played, and I may not have had to have surgery at all. To try to compensate I injured the other knee. It was miserable...just miserable. It was very much a learning experience. I would never do it again.
The Ankle and Foot

Acute ankle sprains are another of the most frequent injuries in racquetball players. Most sprains are first-degree and are treated in the usual fashion. Ice and elevation, combined with graded exercises, should be encouraged. Some trainers recommend extra support for the first six weeks after play is resumed.

Achilles tendon problems are also frequently encountered. Chronic Achilles tendinitis is characterized by gradually increasing pain that is aggravated by activity and relieved by rest. Rest is most important in the treatment of acute injury. Once pain subsides, gradual stretching of the tendon, along with calf strengthening, should be used.

costs and rational decisions. Some of the motivational factors of accepting the risk of pain and injuries include a sense of responsibility to your team, the opportunity for material rewards and financial security, status, recognition and the cheers of the crowd. Management will look at playing with pain in a whole different light. They will see pain and injury as a necessary part of the game and that injuries should not get in the way of the game. Athletes should subordinate their individual interests and dedicate their bodies for team, club or management purposes.

Playing with pain may relate to your character and having something to prove as an athlete. Pride in your ability, fitness, and invincibility motivates athletes. The more closely a person’s livelihood is tied to sports, the more likely it is that the person will accept the risk of playing injured or publicly express a positive image of sport. Pain and injury are worth the risk when balanced against the many benefits associated with sport. Athletes are especially likely to articulate thoughts and feelings that reflect on their personalities, commitments, pride, and confidence as athletes. Athletes are exposed to a set of mediated beliefs about role constraints and values, rationalization, and athletic socialization that conveys a message that athletes ought to accept risk and injury in sport. By the acceptance of these risks, it becomes normal to expect pain and injury in sport. We accept this as normal just to be able to participate.

Our culture sends a message that encourages a kind of self-abuse addiction. This refers to the grip that playing in pain has on athletes. Minimizing discussion of pain or injuries speaks silently about an athlete’s commitment not only in sports, but in life as well. Coaches talk about how pain and injury give athletes opportunities to prove their character.

If athletes derive their status, identity, or livelihood largely through sport, they may not hear the external voices of caution or concern until they no longer are able to play their sport at all. Risk and

Caryn McKinney: I’m not going to play hurt if it’s going to make the injury worse or cause further damage. If it was just pain, my commitment was to do the best I could at any given time. My commitment to the tour was to be there for both the tour and myself. I can remember playing out two seasons with injuries that didn’t allow me to play my best, but I felt a responsibility to play with the injury and take care of it after the season. I had to be more disciplined and conscious about doing things mechanically correct so not to irritate the injury. I played more conservatively than I would have normally.
Jim Hiser: Playing hurt as a recreational player is much different than playing hurt as a professional athlete. Recreational players usually have other responsibilities such as family and occupation and the chances of greater or permanent injury and damage normally doesn't justify the risks of playing injured. Common recreational injuries such as pulled muscles, sprained ankles and inflamed shoulders will normally cure if given a short time of rest and treatment. For recreational players the slogan of “there's always tomorrow” is much more applicable than for the professional athlete.

Racquetball requires a snapping motion of the wrist. Thus, the tendons and ligaments of the wrist are frequently injured. While conservative treatment is the rule, a review of the player's stroke mechanics is also important. Consultation with a club professional is recommended even for an advanced player, because correcting flaws of form in the swing, especially in the backhand swing, can prevent most recurrences of wrist injuries.

Most injuries in racquet sports are those of non-disabling type of which we all have played with at some point in time. You must be able to recognize the disability injuries that have potential to harm you permanently.

Ultimately, we as recreational athletes play hurt or injured because we love the game we play and derive some significant benefit. Simply put, the benefits of playing injured (for the most part ...) seem to outweigh the risk of more serious injury.
A heartfelt thanks to the players, spectators, volunteers, advertisers, and sponsors for their contributions to the success of the 1995 WSRC event!

We invite you back next year

1996 World Senior Racquetball Championships
August 27 - 31, 1996 • Albuquerque, New Mexico, USA

From the WSRC Council
And the New Mexico Department of Tourism

New Mexico
America's Land of Enchantment
The International Racquetball Federation’s VII World Senior Racquetball Championships were held in Albuquerque, August 28 through September 2. This year, 360 players representing 38 states and 10 countries were in attendance — numbers which also marked the largest participation by women in the history of the event.

Beginning its second decade in Albuquerque, this event continues to enjoy tremendous success. Levels of competition have reached an all-time high as players and spectators continue to return year after year for their racquetball vacation in the Land of Enchantment. The event is also a designated fundraiser for Olympic Racquetball 2000, an effort to support racquetball’s bid to become a full-medal, Olympic event. At this year’s tournament banquet, attended by over 400 players and guests, the WSRC Council presented the IRF/AARA with a check for over $10,000 as its initial contribution from the proceeds of the tournament.

Players who have excelled in this tournament in the past, including Ohio’s Dave Kovanda and Jerry Winsberg of Louisiana, returned for the competition and camaraderie. Kovanda was defeated by Mike Murphy from California in the finals of the Men’s 45 division, 15-7, 15-14. Winsberg advanced to the semifinals of the Men’s 55 division where he was defeated by Jerry Davis from Ohio 9-11, 11-8, 11-0. Michigan’s Gordon Kelly defeated Davis 15-12, 15-6 to take the Men’s 55 division.

Texan Dave Peck, former pro tour veteran, took part in the competition for the first time, and was defeated 15-12, 15-5 by Men’s 35 defending champ, Mike Martinez from California. In an unusual turn of events, New Mexican Gary Mazaroff and Randy Stafford from Tennessee agreed to a draw in the Men’s 40 finals when Stafford could not return for the tiebreaker after suffering symptoms of altitude sickness. In the men’s 50 championship round, Joe Gellman from New Mexico advanced to the finals following 11-10 tiebreaker decisions against Idaho’s John Aldape in the quarterfinals and Florida’s Russ Deegan in the semi-finals. Mike Aubry of Arizona defeated Gellman in the finals 15-11, 15-7. In the highest age division, Texan John Pearce earned the title over Maryland’s Harry Steinman who placed second in Men’s 80 round-robin competition.

In the women’s competition, the calibre of play also improved this year. Californian Debra Tisinger defended her Women’s 35 title with a win over Karin Sobotta of Washington state, who advanced to this senior event after winning the Women’s 30 national title. Joanne Pomodoro from Massachusetts concluded her year-long quest to win the Women’s 40 title by defeating Wanda Collins from Washington 15-2, 11-15, 11-2. A long-time participant in the annual event, Pomodoro had often advanced to the championship round, but never won a title. This year, she set her goal and worked throughout the year determined to win the title. Her hard work paid off.

“I’m not looking at anyone,” said Joanne early on, describing her game plan. “I’m looking at shoes.” The diminutive jokester’s intensity paid off with the win, after which she was able to loosen up without fear of losing her edge.

Sharon Hastings-Welty of Oregon continued her long-time domination in the Women’s 50 division by amassing a total of 433 total points in round-robin competition. A three-way tie for second was declared in the

Women's 50 with Nidia Funes, Pat Tarzon, and Jeannie Van Winkle each accumulating 376 total points. Jo Kenyon, Reta Harring, and Mary Low Acuff were winners this year with Kenyon again taking the Women's 60 title, Harring took the Women's 65 title, and Mary Low Acuff the Women's 75 title in round-robin competition. Ireland's Bridin Ui Mhalogáin and Peggy O'Brien returned, after a five-year absence, to place second in Women's 65 and third in Women's 60, respectively. Marion Russell won the Women's 70, uncontested, in her first appearance at the event.

The WSRC Council wishes to acknowledge the tremendous support of the Albuquerque community for this event. For over a decade now, so many of our local sponsors have donated their time, money, and talents to support tournament operations and fundraising activities. This year at least 110 volunteers contributed their time and energy in all areas of tournament operations before, during and after the event. Proceeds from the tournament also support the New Mexico WSRC Scholarships, first established in 1994. Since then, the WSRC Council has awarded $2500 in scholarships to members of the New Mexico racquetball community.

Tournament operations were headquartered at Tom Young's Athletic Club. Matches also took place at Midtown Sports and Wellness, and at the Kirtland Air Force Base East Gym. Over the course of the five-day event, almost 1600 matches were played, with championship matches held on Saturday. The format for this tournament is unique among international racquetball competitions. It provides round-robin competition for senior men and women ages 35 to over 80, in five year incremental age group divisions, that guarantees each participant at least seven preliminary-round matches.

The tournament was first hosted by the New Mexico Racquetball Association in 1985 as the Veteran Senior Masters National 40 and over Racquetball Championships. Eighty-five players participated. In 1989, it was designated as the World Senior Racquetball Championships and an official event to support Olympic racquetball. Over $2,000 was raised that year. In the last six years, the WSRC has raised a total of more than $100,000.

**MEN’S DIVISIONS** — Men’s 35: Mike Martinez (Calif.) def. Dave Peck (Texas) 15-12, 15-5; Men’s 40: DRAW — Gary Mazarakoff (N.M.) and Randy Stafford (Tenn.) 9-15, 15-10; Men’s 45: Mike Murphy (Calif.) def. Dave Kovanda (Ohio) 15-7, 15-14; Men’s 50: Mike Aubry (Ariz.) def. Joe Gellman (N.M.) 15-11, 15-7; Men’s 55: Gordon Kelly (Mont.) def. Jerry Davis (Ohio) 15-12, 15-6; Men’s 60: Paul Banales (Ariz.) def. Ols Chapman (Ohio) 15-12, 15-9; Men’s 65: Joe Lambert (Texas) def. **WOMEN’S DIVISIONS** — Women’s 35: Debra Tisinger (Calif.) def. Karin Sobotta (Wash.) 15-14, 12-15, 11-5; Women’s 40: Joanne Pomodoro (Mass.) def. Wanda Collins (Wash.) 15-2, 11-15, 11-2; Women’s 45: Shelly Ogden (Ohio) def. Judy Sands (Ill.) 7-15, 15-6, 11-0; Women’s 50: Sharon Hastings-Welty (Ore.) def. Nidia Funes (Calif.), Pat Tarzon (Ill.), and Jeannie Van Winkle (Mo.) in a 3-way tie; Women’s 55: Marion Johnson (Texas) def. Kathy Mueller (Minn.); Women’s 60: Jo Kenyon (Fla.) def. Lola Markus (Ill.); Women’s 65: Reta Haring (Wt.) def. Bridin Ui Mhalogáin (Ireland); Women’s 70: Marion Russell (Calif.) unchallenged; Women’s 75: Mary Low Acuff (N.C) def. Eleanor Quackenbush (Ore.).
Four days after the finals of the 1995 U.S. Olympic Festival, eight members of the U.S. National Racquetball Team embarked on a three-week journey to the Far East to compete against the top teams in Asia.

The first stop was Tokyo, where the U.S. team went up against hometown members of the Japanese national team, then went on to compete against more of Japan’s best from the city of Osaka. With racquetball on an upswing in the country, the Japanese team has made major improvements since the ‘94 World Championships in Mexico. While the U.S. team dominated the competition, the Japanese were not far behind.

From Japan it was on to the beautiful island of Guam where we were greeted by a highly enthusiastic Guam Racquetball Association. This leg of the trip included many clinics and demonstrations by the team, in as many as four different venues on the island. The visit culminated with competition against the Guam national team and a major announcement by the Guam Olympic Committee that racquetball has been selected as full medal sport in the 1999 South Pacific Games.

Next up was the hot, sultry city of Seoul, Korea where we were greeted by President Chang and Vice President Kim of the Korean Amateur Racquetball Association. Competition followed against Korea’s best, along with several instructional clinics. Korea courts have doubled from 33 in 1994 to 66 in 1995, along with a player base that expands daily. It was very exciting for all of us to see the growth of racquetball in such a key Asian country.

Heading “down under” to Melbourne, Australia, U.S. men faced off against the #6 world-ranked men’s team at the Kings’ Court, which featured five glass competition courts patterned after
some of the best facilities in the U.S. It is interesting to note that in the Melbourne area there are over 20,000 players playing Australian Rules Racquetball on squash courts, using a very slow ball, the tin, and squash rules.

Touring cross-country to Sydney, the team participated in the first ever Australian Open, where it dominated the men’s and women’s divisions ... but the potential for excellence on behalf of the Australians is great.

It was a great trip for making new friends, re-visiting old ones, generating new excitement for the sport, making great Olympic contacts, and logging lots and lots of miles.

The Asian Tour Group '95 — Malia Bailey, Mike Bronfeid, Dan Fowler, Jackie Gibson, Michelle Gould, Cheryl Gudinas, Brian Rankin, Tim Sweeney (athletes); and Margo Daniels (team leader), Luke St. Onge (IRF) and Jim Winterton (head coach).

A special thanks for their great help and hospitality during the U.S. Team visit:
In Japan — Scott Shaeffer, Michikane Ishiguro, Koichi Kitamura, Yoshikazu Nagai, Michio Ishimoto, Toshiyuki Kohroh ...
In Guam — Belinda Alcantara, Karri Trahin, Gerry Perez, Steve Serukle, Judge Benjamin J.F. Cruz, and the entire Guam Racquetball Association ...
In Korea — President Nam-Hwan Chung, Mr. Jong-Sun Kim, Mr. Don-Am Chang, Mr. Tae-Hoon Chung, Mr. Song C. Fedasz, and the entire Korean Amateur Racquetball Association ...
In Australia — Philip and Kae Mort, Craig Wilson, Darien Stringers, David Rowe, Douglas Pell, and the entire Australian Racquetball Association.
Assault Series racquets have already become legends on the court with their lightweight, ultra stiff frames. In fact, our graphite and graphite/spectra fiber constructed racquets have proven in independent tests to be the stiffest in the industry. It's this shock absorbing, vibration dampening make-up that gives the Assaults their awe-inspiring power.

Spalding's patented Reverse Sunburst string pattern re-defines the traditional "sweet spot." Located at the upper end of our new Assault Series Racquets, The Mean Streak was developed with the input of our tour pros who are always grasping for more power.

The Mean Streak is anything but sweet, in fact, it's downright mean, just ask your opponent when you're helping him off the floor. Combine the Mean Streak with the Assault Series' lightweight, incredibly stiff frames and you've got your hands on some awesome power.

Do you want to be meaner on the court? Then go to your racquetball pro shop or sporting goods store and look for the latest Assault Series racquets. When it comes to making racquets, Spalding doesn't play games.

NEW ORLEANS ELMWOOD SUMMER COOLER PRO-AM
By Darrin Schenck

The International Racquetball Tour [IRT] season kicked off at New Orleans' beautiful Elmwood Fitness Center in late August — in spite of the fact that, only a few short months ago, the club had been under three feet of water from tropical storm flooding! This is one of the nicest facilities the IRT visits during its season, and our hats go off to Ken Kachtik and the crew at Elmwood for getting the club back to its usual high standard in such a short time!

The tournament's first round began with local players Abe Valdez, Jaime Arroyave, Mark Bloom, and David Rahn taking a shot at visiting IRT pros. Bloom fared the best, sneaking the second game from Tim Doyle. Other first round notables were Jason Mannino outlasting Todd O'Neil, coming back from down two games to one to win in the fifth 11-9. Adam Karp was stretched to five games in a see-saw battle with Darrin Schenck, but Karp prevailed in the fifth 11-8.

The round of sixteen boasted a few minor upsets including John Ellis' three straight games over Sudsy Monchik. Scott Reiff benefitted from a first round forfeit over an ailing Kelly Gelhaus, and a well-rested Reiff took out #3 seeded Tim Doyle in four. And, as has been the trend for most of last season, a frustrated Woody Clouse lost to Aaron Katz in the fifth. Cliff Swain cruised past Tony Jelso, Mike Ray defeated Louis Vogel and Drew Kachtik beat Adam Karp, all in three games.

The quarterfinals always provide some hot Friday night action, and this tournament was no different. Drew Kachtik and Mike Guidry played one of the most exciting matches seen in quite a while; both players were diving seemingly two and three times in each rally, forcing the other player to hit perfect shots to earn a point. Guidry fought back from two to one down to win in the fifth 11-7. Scott Reiff continued to play some excellent ball as he outlasted Mike Ray in a game of contrasts. Ray is one of the premiere control players still left on tour, and Reiff is one of the hardest hitters around. In the end, power prevailed and Reiff won 11-7 in the fifth. Swain beat Ellis in three close games and Roberts also beat Katz in three not-so-close games.

The semis matched Mike Guidry and Cliff Swain on the top half, and Andy Roberts and first-time semifinalist Scott Reiff on the bottom. Swain continued his dominance, not losing a game to anyone in the tournament, and advanced past Guidry in three straight. Reiff started out by winning the first game, getting most of this points with pinpoint accurate lob serves to Andy's forehand. The next three games would be a different story as Roberts won in four.

The final shaped up to be the expected number one vs. number two. Swain started off strong with an 11-5 first game win. Roberts then lifted his game and outlasted Cliff in the second 14-12, and seemed to take the momentum of that game through the rest of the match as he won game three, game four, and the first pro stop of the year.

THE STOCKTON COORS LIGHT PRO-AM TRADITION

The IRT journeyed to Stockton, California for its annual Pro-Am in September at the Westlane Racquet Club. A popular stop on the tour, this site hosts the longest running pro event in racquetball history, and the tradition has always attracted some of the best action around.

The draw provided some terrific action in opening rounds, with Adam Karp and Michael Bronfeld being by far the most even contest. Bronfeld gave Karp all he could handle until the fifth game, where Karp closed him out 11-4. Gerry Price made the short trip from his hometown to his event, but staged a lackluster performance against a razor-sharp Mike Ray, who won in three straight. Greg Freeze took the first game from Kelly Gelhaus, and then got handled easily in the next three, 11-2, 11-2, 11-5.

The round of sixteen had a handful of surprises, one of which was the hard-hitting Louis Vogel crushing Drew Kachtik in three. Drew seemed to be a “little off” and Vogel played a nearly flawless match, winning 11-8, 11-7, 12-10. The next upset went to Adam Karp, who beat ex-hometown star John Ellis in three. Rounding out the new names venturing into the quarters was Tony Jelso, who defeated a slumping Tim Doyle in four games, winning the third 14-12, and the fourth 11-9. Other round of sixteen match-ups included Swain versus Mannino with Cliff winning in three, Woody Clouse and Mike Ray with Ray winning in four, Monchik and Gelhaus with Sudsy winning in four, Mike Guidry over Dan Fowler in three, and Roberts over Mike Engel in three.

The quarterfinals saw a major twist in the usual tournament plot: Cliff Swain loses! Mike Ray hit laser-accurate shots to win the first 11-6 and squeak the second 12-10, before Cliff temporarily woke up to win 11-0, only to lose 11-4 in the fourth. Sudsy took out Tony Jelso in four, dropping game three in the process. Mike Guidry got all he wanted from Adam Karp, with both players all over the floor. These two guys are known for their getting ability, and the crowd applauded their efforts in each rally. Karp lost a close battle 12-10 in the fourth. Roberts cruised past Vogel in three straight 11-7, 11-4, 11-5.

The semis pitted Mike Ray against Sudsy Monchik in the top half, but it was all Sudsy as he blew past Ray in three straight 11-1, 11-9, 11-4. The bottom half had the David and Goliath match-up of Andy Roberts and Mike Guidry. The two traded games until the fifth where Andy took control of the match and won 11-4.

So the stage was set: the match-up in the finals pitted two players who shoot everything reachable, and Sudsy even shoots the ones that look unreachable to the rest of us.

IF YOU CAN'T STAND THE HEAT, STAY OUT OF THE COURT.

But if you like it hot, play the Penn Ultra Blue Racquetball. And if your opponent objects, hey, just point out that the door's not locked. The Official Ball of the AARA.
The match-up was a crowd pleaser, with the first game lasting over half an hour! Sudsy squeaked that one out and took a 10-5 lead in the second. At game point, Sudsy hit a perfect crack ace to the backhand side and he thought that was the end of the game, but the referee called it short! Roberts battled back to 10-10, but Sudsy again pulled it out. That seemed to take the wind out of Andy's sails as Monchik, who was a finalist in Stockton last year, won the oldest pro event in racquetball.

CRYSTAL CITY HERE WE COME!!!
The IRT visited the Skyline Athletic Club at Crystal City Gateway for the third event on the pro schedule this season, the Charles E. Smith Companies Crystal City ProAm. Missing in action were Tim Doyle due to an injury, Woody Clouse, Aaron Katz (congrats on your new job!), Eric Muller (good luck at Harvard), and a recovering Ruben Gonzales, who was on hand but not yet back on the court.

Some local favorites took the stage against pros in the first round, although no one could manage to steal a game from the tour players. Kyle Purdy, Troy Brooks, Kerry Graham, Jeff Elder, Sam Wasko and Ed Willis ... welcome to the big league, boys! Worth noting in the first round was the two hour plus battle between Mike Engel and Derek Robinson. The two traded games until the fifth, including a 16-14 third game win by Engel, and in the fifth Engel squeaked past Robinson 12-10. Jason Mannino took out Scott Reiff in four and Kelly Gelhaus, slowed by a bad ankle, outlasted David Hamilton in five. Josh Messina broke through into the round of sixteen for the first time against Todd O'Neil in three straight.

Round two began with Andy Roberts quickly dismissing Messina from the tournament, Drew Kachtik edging out Gelhaus, Mike Guidry defeating a worn out Engel, Mike Ray beating Tony Jelso in four, John Ellis cruising past Brian Rankin in three, Dan Fowler advanced with a come-from-behind victory over Louis Vogel, Cliff Swain defeating Mannino in three, and Adam Karp taking out Sudsy Monchik in five long games. This was one of the best matches of the weekend, with Karp up 2-0, Monchik stormed back to go to the fifth, but Karp jumped out to a big lead, and went on to win 11-2.

The top half of the draw saw Cliff Swain play flawlessly and cruise past John Ellis in three and Mike Ray advance over Dan Fowler in three, although Ray did get stretched to a 15-13 second game. The two matches on the bottom half of the draw were a spectator's delight, with the match between Mike Guidry and Drew Kachtik going the distance. Kachtik won the first two games 11-2 and 11-4. The fifth game was tight in the beginning, with both players trying to gain an edge, but in the end Kachtik pulled away and won 11-4.

Adam Karp was now faced with the task of beating Andy Roberts to keep his tournament upset streak alive. Again Karp jumped out to a two game lead, keeping Andy off balance with an array of lob serves for which Karp is known. Roberts battled back in the next two games, with Karp being forced to use an injury time out to practically re-attach his little finger on his right hand. Karp would not be denied however, and came back to win the fifth game 11-9.
Ashaway—
The only U.S.-produced racquetball string brand has been selected as the official string of The American Amateur Racquetball Association.

Choose one of Ashaway’s line of racquetball strings—specially engineered for different playing styles—and make your game more enjoyable and successful while supporting your national association. It makes perfect sense—the only U.S. Manufacturer of racquetball strings supporting U.S. Racquetball. Improve your game and support your sport today!

FOR DURABILITY

Durakill™—this 15 gauge composite string has a core of bullet-proof Kevlar® surrounded with a tough, resilient, spiral-braided surface. Recommended for players who generate a lot of power and are chronic string-breakers. No matter how high the tension or how oversized the racket head, this string will last and perform beyond all expectations.

FOR POWER

PowerKill™ PRO—this 16 gauge composite string has a core of super-resilient Zyex® fibers surrounded with a spiral-braided surface. Recommended for players who want to increase the power in their game. The performance and responsive feel of this string make it play like a 17 gauge string, but with superior durability. The most powerful string on the market in all rackets at all tensions.

FOR ALL-COURT RESPONSE

SuperKill™ II—this 16 gauge string is produced from multiple strands of monofilament fused together and coated with an abrasion-resistant wear layer. Recommended for players of all skill levels, this string resists notching and premature breakage while providing excellent ball control. Now available in four colors: gold, optic green, purple, and white.
Swain (diving) and Ray battle it out in Crystal City. Photo: Courtesy Killshot.

This tournament breaks the tour standard of having the semis and finals on separate days, with the semis being held Saturday morning at 10:30 and 12:00, and the finals at 7:30 p.m. The semis pitted an obviously tired Karp against Kachtik in the first match of the day and Karp was probably wishing he had more time to recuperate. Kachtik blew past him in three straight, advancing to his first final in over two season.

The other semi was a rematch of the quarters in Stockton where Swain was defeated by Ray in four games. Ray got off to a good start by winning the first game 11-8, but Cliff won the next two games 11-9 and 11-8. The fourth was a back-and-forth battle with Ray winning 12-10. Ray repeated his upset performance again winning 11-8 in the fifth, and advancing to his first final this season.

The final was played to a packed house in the Skyline Club, with the exhibition court with sidewall and backwall glass giving every fan a good view of the action. The first game was a true test of will, as the win-by-two format again came into play. Kachtik won the battle 15-13, and went on to win the war 11-9 and 11-7. Drew captured the third stop of the season and hopefully some of the “raw power” he displayed in the early 90’s.

SPALDING IRT SATELLITE TOUR:
Spalding and the IRT are proud to announce that the Satellite Tour will include over 75 events this season in six different countries. These events offer lower ranked players the opportunity to earn prize money and ranking points while working their way up to the IRT Tour full time.

DOYLE OUT: Third ranked Tim Doyle, one of the hardest hitters on the IRT Tour missed the Arlington event due to a back injury but expects to be back by Montreal and the first VCI event.

IRT TOUR REFEREE: IRT has hired Dave Sable of Atlanta as the head referee for the IRT. Sable, considered

What More Winning Players Shake with After a Match.

The new Penn Tac Racquetball Glove ensures you'll have both a strong grip on your racquet and your opponent's hand while you're saying: "Hey, better luck next time!"

IRT UPDATE
By Hank Marcus

SPECIAL THANKS: Thanks to Vicki Garrett for putting together a great event once again, and to the entire Elmwood Fitness Center crew for being terrific hosts for the first pro stop of the season! Special thanks to Coors Light, the Westlane Racquet Club and Rob Farrens and Barbara Timmons for putting together their usual terrific event over the Labor Day weekend. The IRT will look forward to returning to Stockton next year! A special thanks to the Charles E. Smith Companies for sponsoring the Crystal City event, and to Blair Desio for running a great show. The hospitality was terrific, and everyone had fun!

VCI CHALLENGE CUP SERIES KICKS OFF IN MONTREAL: The 1995-96 VCI Challenge Cup Series, present by VW Credit, Inc. kicks off its fourth season this October in Montreal. The VCI events feature stops throughout the United States and Canada. Last season Andy Roberts captured the prestigious VCI World Championship with a win over Cliff Swain, but Swain captured the VCI Cup for overall performance in the VCI events for the second year running.
by the players to have the best feel for refereeing at this level will be at each IRT event and referee all matches beginning with the quarterfinals.

IRT PHONE CARD A HIT: Target Tel and IRT kick off another season with the officially licensed pre-paid calling card. A portion of each card is donated to Fibromyalgia research.

LIMITED EDITION IRT VIDEO TAPE: The 1995 IRT Professional Nationals: The two best players on the planet fight for the ultimate title in racquetball as #1 Cliff Swain battles #2 Andy Roberts before a sellout crowd in Portland. Commentary by Aaron Katz, Sudsy Monchik and Hank Marcus.

TACKI-MAC SIGNS CLIFF SWAIN: Tacki-mac and Cliff Swain signed a three-year contract to feature Swain in the company's international advertising and marketing campaign. Tacki-mac also signed a three year agreement to be the "Official Grip" of the tour, with terms which include a $2,500 bonus pool for the top five end of season ranked IRT players who use Tacki-mac grips, plus developing an innovative new IRT pro grip which will be marketed worldwide by the fall of 1996.

HEAD SIGNS SUDSY MONCHIK: HEAD Sports, Inc. announced that a long term agreement has been reached with IRT star Sudsy Monchik. Monchik will immediately start playing with HEAD's new Big Bang racquet. Marketing plans for Monchik include full integration into HEAD's advertising campaign, and action-oriented full size poster, and a future national Swain vs. Monchik exhibition tour.

LEADER RENEWS AS “OFFICIAL EYEGUARD” OF THE IRT: Leader Sport Products announced its new three year agreement to continue on as the “Official Eyeguard” of the IRT. Leader followed up this exciting news by launching two new fashion eyeguards for racquetball: the Vegas and the Newport. Pro players on the IRT helped to develop these products including Cliff Swain, the world’s #1 ranked player.

IRT CHOOSES BABOLAT AS OFFICIAL STRING & MACHINE: Amy Wishingrad, Penn's National Promotions Manager announced recently that Babolat has been chosen as the official string and machine of the IRT. Babolat is also known for the high quality and advanced technology of their synthetic gut string. Babolat products are distributed by Penn Racquet Sports in the U.S.

IRT PROPERTIES, INC.: The IRT and Complete Creative Sports Marketing have formed IRT Properties, Inc., a marketing arm of tour responsible for the authorized usage of the IRT name, logo and inherent rights. Similar in function to NFL or NBA Properties, the group will negotiate the licensing of products to carry the IRT endorsement or logo for commercial use. IRT Properties, Inc. will secure agreements with companies to use the IRT name and logo on licensed products, both in the racquetball community and outside the industry. IRT Properties, Inc. will also be responsible for protecting the use of the IRT name and logo against unauthorized commercial usage. For information on licensed usage of the IRT name or logo, please contact: IRT Properties, Inc., 1852 Tamarack Circle South, Columbus, Ohio 43229, 614/844-3939, Steve Lerner.

Cliff Swain (top) & Sudsy Monchik sign endorsement agreements. Photos: Courtesy IRT.
In some sports you just protect yourself.

Now you can protect yourself in style with impact resistant fashion eyeguards from Leader. Our Vegas and Newport designs feature anti-fog, anti-scratch, shatterproof protection. And they give you unobstructed peripheral vision so you won't miss a beat on the court.

Don't just protect yourself...do it in style with Leader:

Looks Can Kill
1994-95 SEASON AWARDS
By Janet Myers

Awards are voted on by WPRA members, however, it is the tour players themselves who have the most influence on who receives the awards for Sportsmanship, Most Improved, Steding Cup, and Player of the Year. Here's a look at the 1994-95 recipients.

Sportsmanship
This award is given to the player who is considered to have exhibited the best sportsmanship consistently throughout the season. The 1994-95 season winner is Lorraine Galloway. At age 33, Lorraine has been on the pro tour for two years. She became interested in playing on the women's pro tour after watching a couple of pro stops. Lorraine decided that the pro tour is the best way to test your knowledge and experience of the game, plus it includes meeting great players and friends. She credits her mother with being one of the biggest influences in her life. Lorraine also believes that her friends keep her on the right track because of their unquestionable integrity. She is determined to win but she will play fair in any situation. When Lorraine isn't playing or teaching racquetball, she enjoys squash, biking, dancing, and traveling. She lives in Jamaica Estates, New York.

Most Improved
This award is given to the player who has made the biggest improvement in her game throughout the season. This season's winner is Michelle Wiragh. Michelle is from Laurel, Maryland, and at the age of 27, she has been on the tour for three years. She felt very excited to receive this prestigious award. It showed her that all the time and hard work she put into racquetball has really paid off. Michelle realized that the people who believed in her, like her mother and friends Mike Engel and Ed Willis, never stopped letting her know that she can compete on a pro level. Now she believes! Michelle first became interested in playing on the pro tour when...
she understood that to improve your game, you had to play the best. She wants to go as far as her abilities will take her. When Michelle is not playing racquetball, she is working as a franchise director for Parcel Plus, Inc. Her hobbies include movies and spending time with friends.

**Steding Cup**

This award is named after the late Peggy Steding, who was very influential at the early stages of professional racquetball. The award is given to the player who has contributed the most to the WPRA both on and off the court. The 1994-95 season winner in Marcy Lynch. In the middle of the season, the president of the WPRA was unable to continue her role. Marcy stepped forward to assume that leadership position. The WPRA is grateful for her commitment. Marcy felt like it was "her time and the right thing to do." She has been on the WPRA Board of Directors for ten of her twelve years on the tour.

Marcy first became interested in racquetball when she became a pro at a tennis club with two racquetball courts. In 1979, Marcy took a "real job" from 9-to-5 for two years. In 1981, Marcy was devastated over the unexpected death of her older brother. A year later, she gave notice at her job, found six investors, and joined the racquetball pro tour. She wanted to know she had dedicated herself to something she loved to do. The lessons Marcy has learned in racquetball are invaluable. She is glad to have an opportunity to contribute to a sport that has given her so much. When Marcy is not playing racquetball, she is a certified nutrition consultant and she helps others create their own businesses. Her hobbies include softball, bicycle touring, and outdoor activities. She resides in Horsham, Pennsylvania.

**Player of the Year**

This award is given to the player who is believed to have performed at a consistently high level throughout the season. Michelle Gould has demonstrated this and accepts her third such honor. At the age of 24, Michelle has been on the tour only six years but has won more titles than most people receive in a lifetime. She gives credit to her husband Rod, who is always there for her. He helps her train and coaches her at tournaments. Michelle believes that you are only as good as the people who support and guide you. Her family and friends are a large reason she did so well this year.

Michelle became interested in racquetball when she watched her first pro match at the age of 12. She thought it would be great to be able to compete in a sport at its highest level. Michelle feels racquetball is not only a great workout, but a great way to meet friends from around the world that you have for a lifetime. When she is not teaching or playing racquetball, she and Rod run their own business called InFormotion. They do consulting work for businesses in the communication field. Michelle resides in Boise, Idaho.

**Janet Myers** is a pro tour athlete and a member of the WPRA Board of Directors.

THE NEW WAVE: PHYTOCHEMICALS AND THE LINK TO CANCER
By Marcy Lynch

Now that we have talked rather extensively about performance and some of the factors which enhance it, let's turn our focus to the future. Where is science going with regard to nutrition and how will this affect our health?

The newest buzzword on the block is phytonutrients or phytochemicals. Phytochemicals are properties of whole foods which, until recently, were not even known to exist. Whole fruits and vegetables are loaded with them and there is growing evidence that the ultimate benefit of these nutrients is in fighting cancer. Instead of chemically stabilizing or neutralizing free radicals the way anti-oxidants do, phytochemicals either keep free radicals from forming or activate enzymes which whisk the free radical (an unstable, cancer causing molecule created by the environment) out of the cell.

One such phytochemical is called sulphoraphane and is found in broccoli, cauliflower, brussels sprouts, turnips and kale. Cooking does not seem to destroy it and synthetic versions made in the laboratory seem to work as well, if not better, than those derived from nature.

Two other phytochemicals called p-coumaric and chlorogenic acid are found in tomatoes, green peppers, pineapples, strawberries and carrots.

Ellagic acid formed in strawberries, grapes and raspberries specifically protect DNA molecules. Free radicals that attack or damage our DNA cause mutations in critical genes, which may be the beginning of a cancerous growth.

Genistein found in soy beans and other soy products (miso, tofu) prevent the formation of capillaries that supply oxygen and blood to tumors. Without a supply line, tumors cannot grow. The full implications of this phytochemical are astounding in terms of reducing or eliminating tumor growth.

Other phytochemicals include allylic sulfide in onions and garlic, capsaicin in hot peppers, and flavonoids in almost all fruits and vegetables.

In addition to these phytochemicals, there are tens of thousands more as yet undiscovered. So how do we make sure we get them? The best way is to eat a variety of fruits and vegetables and aim for the recommended five to nine servings a day, since food is the best source of these nutrients. There are a few forward-thinking companies who have started to use actual food powders in capsule or rehydratable form to address the needs of a society that struggles to follow the food guidelines. These supplemental forms may actually fill in the gaps between what we need and what we actually get in the same way vitamin and mineral supplements do.

To some degree, the more we learn about what's good for us, the farther we seem to stray from doing it ... plus there's no guarantee that the information we learn today won't be different tomorrow. We probably won't have definitive answers to our total nutritional needs in our lifetime. Nutrition research is a fast-growing, ever-changing field of knowledge. What we can do is keep up with what is most current and put our best foot forward by taking advantage of what we do know for today. There's still no guarantee we'll live longer, but we can hope to lead an active, productive and healthy life — however long that may be — rather than struggle through our later years debilitated from disease.

I welcome your feedback on these articles or anything nutrition related. Feel free to call with questions or suggestions for articles (what do you want to know?). The nutrition helpline is 800/473-9743.

"THE WINNING EDGE" Instructional Video
By Cliff Swain
Cliff Swain details the entire technique of the game of racquetball as he plays it. For the first time the undisputed King of racquetball sets out in complete detail every instructional aspect of hitting a ball. Get inside the head of the most dominant player to ever step on a court as he shows you: the Mechanics of a Powerful Stroke, Forehand and Backhand Principles, Service and Service Return, Shots of the Game, and Drills and Conditioning. The Winning Edge is a blueprint for successful racquetball. Let "The Winning Edge" bring out your hidden potential and allow you to enjoy racquetball to the fullest. Suggested Retail: $34.95 • SPECIAL AARA INTRODUCTORY PRICE: $24.95. Visa & M/C are accepted.

Racquetball 808
Racquetball 808 proudly introduces its line of clothing. Beautifully embroidered designs are done on a cotton and poly blend sportshirt. These wash and wear colorfast sportshirts are perfect for work, leisure or play. No longer will racquetball players have to wear those other shirts with funny animals on them. At least not while Racquetball 808 has shirts for everyone. Screen printed attitude tee-shirts and tanks in 100% cotton are great for wearing on the courts. Embroidered hats and towels are a sure way to finish off a racquetball player's wardrobe. For more information or to place an order call 808/677-0323.

See page 74 for an order form ...
As the #1 ranked professional player, Cliff Swain knows the advantages of having a good grip on the raquetball court. That’s why he switched to tacki-mac, the official grip of the I.R.T. available in both knurled and serrated textures and a rainbow of colors. Get a grip on your game. Get tacki-mac.
Y
ou are giving your clinic and discussing all the
key aspects of the game of racquetball, when
suddenly, half of your audience gets up and
leaves in the middle of one of your key statements.

Totally amazed, you look at the remaining clinic
participants for support and suddenly realize that
they are all asleep. You don’t know what to do, sheer
panic hits ... then you wake up from your nightmare
in a cold sweat, happy to realize that it was just a
bad dream!

Well, rest easy. Here are a few ways to keep your
clinic groups entertained and begging for more:

Make it Fun!
People are usually nervous when they come to a
clinic. They’re afraid of missing a shot in front of a
group or maybe not being able to answer a question.
In any case, they are often petrified.

To combat this, I start things off by having some
laughs at my own expense. The subliminal message
is “if the pro can make a mistake and have fun, so
can we.” I can usually feel the whole group “lighten
up” and begin to have a good time.

Know the Group’s Skill Level!
Know the level of your clinic participants. This will
help you decide on what topics to discuss along with
the depth of your discussion. For example, when
working with beginners, I talk about stroke mechan­
ics (for example, how to hit the ball properly) and
how to position themselves after the serve and during
the rally. On the other hand, when I’m working with
more advanced players, I discuss different ball
contact points during the stroke and how to position
themselves in relation to the ball position in the
opponent’s power zone.

Ask Questions!
In school, we all had classes where the teacher talked
the whole time. Consequently, we became bored out
of our minds and took the opportunity to daydream
or even take a nap. By asking questions of your clinic
participants you actively involve them both mentally
and physically. They don’t have time to get bored or
“to dream about paradise.” Ask questions like:
“Why did you hit that shot?”
“What was your proper position on the shot?”
“Where was the ball in your power zone?”
“How often should you hit that serve?”
“Which shot is your highest percentage?”

Get Physical!
Once you go over a certain instructional point, have
the participants warm up and hit that certain shot,
position themselves to the ball, or hit that drive serve.
Whatever the situation is, get them involved and
doing the exercises.

Keep it Moving!
Boredom is a clinician’s worst enemy. Things aren’t
fun when you’re bored. If one of the clinic partici­
pants is holding up the flow of the group and having
difficulty, offer your assistance after the clinic, but
don’t keep everyone else waiting. Helping that person
after the clinic can also pay huge dividends when
they tell everyone how great an instructor you are for
taking time for added, individual instruction.

Remember, if your participants are bored, don’t count
on them to come back to your next clinic.

Free Fun Giveaways!
Have some door prizes available to give out to the
clinic participants. Doing this gives the clinic, and
you, an image of professionalism plus adds interest,
fun and credibility. Everyone likes to get something
for “free.”

Remember, boredom is your worst nightmare in a
clinic setting — but “informative and fun” never
fails!
Nothing ignites the spirit of athletes like a serious challenge. And nothing helps them rise to it like a low-fat, highly nutritious PowerBar. Its unique formulation gives your body the energy it needs to reach and sustain its optimal level of performance.

So next time you have a challenge to meet, rely on a PowerBar. It's fuel for your fire.
The Only Racquet With A Second Source Of Energy.
From PROKENNEX, The Pioneer In Racquetball Technology

Kinetic Technology
It provides our new ProKennex racquets a secondary source of energy to give you unprecedented levels of power, performance, feel, and shock absorption. Studies conducted at independent laboratories worldwide confirm that compared to traditional racquets, Kinetic system technology provides a:

- 20% reduction in shock
- 43% damping of vibration
- 15% increase in "power zone" or "sweet spot".

Whether you're a top pro, a beginner, or a recreational player—the Kinetic's unique secondary energy source will provide immediate benefits to your game.

To take the KINETIC CHALLENGE and experience the KINETIC EXPLOSION call 1-800-729-1771

"I have tested racquets for ten years and the Kinetic blows all of them away, it's a 10 in all categories."

- Mike Martinez
World Seniors Champion

"This racquet is a power 10! The weight is beautiful and the Kinetic has no vibration."

- Sharon Rummel
California State Assoc. President
“The Kinetic is quick and smooth and delivers the power I need to blow the ball past my opponents. There is no vibration and I have no arm problems. It is awesome!”

-John Ellis
World Champion

“The secondary energy source gives more power with less effort, off center shots have more pace.”

-Marty Hogan
Racquetball Legend

A NEW ENERGY SOURCE
BETTER SHOTS. MORE OFTEN. LESS WORK.

HERE'S HOW IT WORKS.
1. As you swing the racquet forward and hit the ball, kinetic mass inside the racquet head stores energy.
2. As the ball leaves the strings, the kinetic mass explodes forward, sending additional energy to the racquet and to the ball.
3. Once the ball has left the strings, the vibration you normally feel with an ordinary racquet is damped by the layers of kinetic mass.

Bigger Power Zone
The Kinetic explosion sends more energy to the racquet which, in turn, expands the power zone. Even balls hit off-center shoot off the racquet.

More Accuracy
The explosion also stabilizes the entire hitting surface of the racquet. The result: less twisting and better direction to the ball which means more accuracy.

Less Shock
The Kinetic reduces shock in the frame which means there's less transferred to your arm. That means less fatigue which will increase your efficiency on the court.
With tournament leagues in full swing, you are probably playing against new and different opponents on a regular basis. Sometimes, it seems that we don’t catch on to what strategy to use against a new opponent until the match is almost over. Analyzing your opponent’s strengths and weaknesses is a skill that takes time and practice to develop. Creating a strategy to capitalize on your opponent’s weaknesses and avoid their strengths is an even greater skill to master.

First, let’s look at ways to analyze an opponent. Then, while not all players fit into neat categories, there are certain “types” of players that allow you to create a general strategy to exploit their game style.

### Analyzing an Opponent
If you have a chance, watch your opponent play a match. You can see first-hand how they handle different serves, how they move (or don’t move), which shots they prefer and which shots are non-existent in their game. You’ll be able to see if they’re the calm, cool type or the hot-tempered type. Write down as many things as you can to help you develop a strategy later on.

If you can’t watch your opponent play a match, you’ll have to pick up tendencies during warm-up and the beginning of the match.

Here are some tips on what to watch for:

---

**If All Credit Cards Are Alike... Why Aren't They Promoting the Sport of Racquetball?**

Every time you use your AARA MasterCard® cards to make a purchase, MBNA America® will make a donation to AARA at no additional cost to you! The cards also display the AARA logo, identifying you as a member every time you use them!

**The bottom line.**

Apply now and you’ll receive following benefits:
- A free can of balls with your approved account
- 10% discount on all national tournament entry fees
- 10% discount on all AARA catalog and video purchases

We feel the AARA MasterCards are far superior to just about any other cards you may carry. Here are some additional benefits you’ll receive:
- No annual fee the first year ... just $40 for the Gold card, $20 for the Onyx card each year thereafter.
- A higher line of credit, up to $30,000
- Unmatched travel benefits including up to $1,000,000 in Common Carrier Travel Accident Insurance® with the Gold card, $300,000 with the Onyx card
- Worldwide acceptance at over 9 million locations.

1. Watch your opponent’s stroke during warm up.
Most players are good at the drop and hit shot. Don’t let a
good drop and hit shot intimidate you, or a bad one lull you
into a false confidence. Instead, notice if the player ever
leaves the drop and hit. The sluggish player will tend to stay
with drop and hit shots, while the aggressive player usually
moves around a great deal to warm up the legs as well as the
arms and shoulders.

2. Look for keys to your opponent’s shot selection,
such as:
• Contacts the ball when it is behind them (such players
tend to hit pinch shots).
• Lets the ball get too close to the body (such players do more
pushing and have less power).
• Contacts the ball out in front of the body (such players
usually hit cross-court effectively).
• Shows a preference and a strength for one side of the body.
   (If a player hits fewer backhands during warm-up, challenge
   the backhand early in the match).

3. Look for glaring weaknesses.
• If your opponent doesn’t like to hit ceiling balls, hit lots of
lob serves and use the ceiling ball as an offensive shot during
rallies.
• If you notice a player jumping up to hit a ceiling ball
   instead of letting it come off the back wall, hit your ceiling
   balls harder so the player is forced to hit the shot off the back
   wall.
• If your opponent is slow of foot, hit an abundance of pinch
   shots to force them to run forward, mixing it up with ceiling
   balls to force them to run backward.

Type Casting
The whole point of analyzing your opponent’s game is
to develop a strategy that will avoid their strengths and
take advantage of their weaknesses. Let’s take a look at
some basic strategies you can use against different
“types” of players.

• We’ve all come up against the quick, fast player. They seem to run down every shot you hit, which
   makes you feel like you have to hit the “perfect shot” in
   order to win the rally. Often, this type of player hates a
   slow game. Lots of lob serves, ceiling ball shots, and
   slow lofty set-ups drive a quick player crazy. Also,
   because this type of player loves to run, instead of
   hitting the ball away from the opponent, hit the ball at
   them. If a quick fast player can’t run they often feel lost
   and out of sync.

• If you come up against a real slow player, the
   obvious strategy is to keep them moving. (Easier
   said than done.) A pinch shot combined with
   passes and ceiling balls can be a big help in
   moving your opponent around. Hitting a pinch
   shot is the most effective way to make your
   opponent run forward. Once they are moving
   forward, run them backwards with ceiling shots
   and pass shots. Wide angle passes work well
   also. A wide angle pass will hit the front wall,
   the side wall, then cut in behind your opponent.
   It makes the player spin, turn, and then run to
   catch up with the shot.

• The tall, long-armed, giant-step type of player
   frustrates everyone. They’re hard to pass, ceiling
   balls are pretty ineffective, and they seem to
   gobble up the whole court in one step. Instead of
   trying to constantly hit the ball away from this
   player, hit the ball at them. It takes some time to
   get those long arms inside to hit a ball that is
   heading for the gut area. They will lose power
   because they can’t extend the arm out away
   from the body. If you must hit a passing shot, go
   for the wide angle pass. No one can cover the
   whole court side-to-side, or cut off every shot.

• Anytime you play someone who hits the ball
   a lot harder than you do, and is a better skilled
   player, you want to try to bring them down to
   your level. Don’t feed into their strengths. Often,
   if you hit a hard drive serve to this type of
   player, it will come screaming back at you 30
   mph faster. High lob serves, half lobs, around the wall
   balls, “Z” balls, and ceiling balls can really frustrate
   this opponent. If you do hit hard serves, mix them up
   with some change of pace serves, similar to what a
   baseball pitcher does. He keeps the batter off balance
   with different pitches at different speeds. You can do the
   same thing with your serves. By changing speed you
   can throw off your opponent’s timing, and throw off
   their game.

Effectively analyzing an opponent’s game is a learned
skill, just like your forehand or backhand stroke. Strive
to develop your game to include several different game
styles. This versatility will be a tremendous asset in
adapting to different player types and game situations.
Good luck!
You know the old saying, “If you fail to plan, you plan to fail.” All too often athletes set themselves up to fail without even realizing it, just by not preparing beforehand. At this point ask yourselves these questions. “Am I guilty of this lack of planning?” or “Am I among the elite, the peak performers who take the time to have a pre-game psyche plan?”

Taking 100% responsibility for your sport results means establishing a pre-game psyche plan, just as athletes like Michael Bronfeld, Michelle Gould, Sudsy Monchik and Pete Sampras have done to achieve their greatness. All too often a player does not do the necessary homework (see Nov/Dec ’94 issue) in order to achieve peak performance.

Before we get started you must completely understand yourself as an athlete as well as a human being, understanding your needs in order to achieve peak performance levels. Athletes thrive on consistency and routine — we are creatures of habit and perform best when there are no surprises — which means optimal performance levels need to have a pre-performance routine!

You must begin preparing 48 hours before your event. What we’d like to do is break down your pre-game psyche plan into three easy steps: nutritionally, physically, and psychologically.

Step #1 is to insure that you are nutritionally ready by eating enough complex carbohydrates (fruits,

**RACQUETBALL Magazine**
grains, pastas, breads and veggies) to store plenty of glycogen (for speed, quickness and energy) in your muscles for game time. Drink enough water (8 glasses daily) to fully hydrate your system. Sound sports nutrition is totally within your control and responsibilities. What you eat will determine how you feel, which will determine your sports performance.

Step #2 is your pre-game physical warm-ups or routine. From stretches, to conditioning drills, to physical warm-ups ... remember your body loves routine and needs to reach the appropriate arousal level for you to perform your best. Find out what feels good and what works — then do it before each match to physically prepare for your best performance. Whether you need to be highly energized, adequately warmed up or relaxed, it is your responsibility to get yourself into that state of physical readiness.

Step #3, finally, is your mental preparation. This is totally individual and unique to each person. Relaxation techniques of deep breathing, muscle relaxation and affirmations can lead into simulation visualization (see May/June '95 issue) exercises. Visualize your game plan, your strokes, your serves, your shots, your distraction control, every possible situation from A to Z. It is imperative that the athlete allow enough time to mentally rehearse performance ahead of time and to “simulate” or go over each match. Often the best time to visualize perfect performance is every night before you fall asleep and every morning just upon waking.

Remember, all the thinking, planning and strategizing should be done before your performance. As thinking and performing do not mix, your body can only concentrate on one aspect at a time. So the athlete needs to mentally prepare before the match so that they can physically get into the “flow state” and perform.

Whether you listen to music, watch a video, say affirmations, go for a walk, take a nap, or sing in the shower, it doesn’t matter as long as you are preparing your mind to get into the “NOW” for your performance. The key is to focus, concentrate and center into the “NOW.” Cover all aspects of your game and your opponent’s game and then let it go!

Remember, peak performances are totally absorbed in the present with no disturbing thoughts, no distractions, and no worries. The past is gone — the future is beyond your control — you can only work in the present time! Here’s a pre-game check of the Four-Quadrant Theory for you to do before each performance.

<table>
<thead>
<tr>
<th>Mind</th>
<th>Body</th>
</tr>
</thead>
<tbody>
<tr>
<td>Spirit</td>
<td>Emotions</td>
</tr>
</tbody>
</table>

* Empty each quadrant until after each competition. Make sure each aspect of your life is clear ... before you actually compete.

**I AM A WINNER**

You need to think like a winner, act like a winner and be a winner before it can come true. Pre-game preparation is all about pulling up your “winning athlete” before you enter the court.

An athlete’s #1 weapon is the mind. Thinking is totally within the athlete’s control. The challenge lies in training your mind to be your ally and not your foe. For it is your true self-understanding and self-acceptance that will ultimately lead to your true self-control.

In closing, please take a moment to look at this wave theory, so you too can achieve peak performance as so many professional and Olympic athletes do:

You are now, truly ready to perform! Good luck!

America's Most Wanted Instructional Video

featuring Jack Newman

"PLAY LIKE
THE PROS"

A GREAT HOLIDAY GIFT!

The Premier Instructional Video.
From the Producers who brought Racquetball to ESPN.
Great Graphics with Easy to Follow Instruction.
Ideal for all Levels from Beginner to Advanced Tournament Player.
Current Techniques on Stroke Mechanics and Strategies of the Game.
Great Teaching Aid.
Cost: $19.95 plus $4.50 shipping/handling.
Also Available to Pro Shops in a 5-pack Display at Wholesale Prices.

To Sign-Up for a Camp or Order Video, Please Send Check or Money Order to:
ROLLOUT INC. • 1520 REGAN COURT • HOFFMAN ESTATES, IL 60195
or Call 1-800-ROLLOUT with VISA or MASTERCARD

Please allow 2 weeks for video delivery.
In achieving success as a racquetball player, we must tie together all the important elements of the game. We've discussed how the serve is so important in becoming a top player at any level, and how practicing by yourself using fun drills was another key piece to the puzzle. This article will help bring everything together with a discussion of mental preparation.

The first and most important thing is to have a positive frame of mind. This means that even in defeat you can search for things that you can use later to improve your game. It also means that you always maintain confidence in yourself that almost borders on being cocky except that you stay humble. Your opponents will always sense this air of invincibility about you. This positive frame of mind will allow you to come from behind in a match even if you are not playing well.

This type of positive thinking must also carry through to all your practice sessions. It has been my experience that we can't judge by our practice sessions as to whether we are playing good or bad. Remember it's only practice, and this is when we work on all our shots. I have even seen other top-ranked pros come into a tournament behind in a match even if you are not playing well.

The key to this process is to relax. I try to find a quiet place and lay down with my eyes shut, then take ten long, deep breaths so that I could completely relax. I would then picture myself in situations during tournaments and see myself hitting winning shots. The more I would do this, the more confident I would become when these shots came up in actual matches. You can visualize hitting that big ace, or retrieving every ball your opponent hits. Remember this takes practice just like the physical parts of the game. As my experience progressed I was able to do this during a match by raising my racquet for ten seconds. The art of visualization can be used in all parts of your life.

I have brought up the topic of mental preparation because I feel that it is 80% of the battle. Most of the matches that we lose are because of mental errors or letdowns. If we can begin to practice our mental game we will see the vast improvements that we are all capable of. So, remember to keep your chin up and always show that swagger and positive attitude. And don't forget to come see us at one of "America's Most Wanted Racquetball Camps" coming near you.

**FIVE EASY WAYS TO IMPROVE!**

**Take lessons and camps** -- Individual lessons on a regular weekly basis are a great way to make your game jump a level. Racquetball camps are also a great way to get a large amount of information over the course of a weekend. Most players really improve greatly during the racquetball camp weekend and get to meet many other racquetball enthusiasts in the process.

**Practice** -- Another big weakness in the amateur game is that most players never practice. They always go out and play matches. This is the most common reason that players get stuck at one level. They play the same group of one or two people and continue to make the same mistakes over and over again. I would like to see each player spend more time practicing during the week so that they can see their game improve.

**Cross Train** -- You can cross-train by jogging, doing sprints, or lifting weights to help you with you racquetball conditioning. You can also play other sports like basketball, squash or tennis to help improve your hand-eye coordination.

**Buy Good Equipment** -- You want to make sure that the equipment you are playing with is appropriate for you. You want to use shoes that are specifically designed for use in racquetball. You also want your racquet to fit your game style. Also take care of your equipment by getting your racquet strung regularly and having a good supply of racquetball gloves so you can grip your racquet well.

**Play Leagues & Tournaments** -- The biggest mistake we make is playing in the wrong league. You should not be continuously winning your league. You should be in a league where you are in the middle of the pack. This way there are always people that can push you to a higher level. If you have time, tournaments are the most fun way to compete against other players from all over the state. It is also a great way to meet players that you might want to play from another club.
Several issues have come and gone since I’ve had time to write this column. Nevertheless, here are my answers to some of the questions I’ve received in the meantime.

Q: Are there any rules governing bouncing of the ball prior to service? Maurice Friedman, Woodbridge, Connecticut.

A: There are several! First, AARA rules place no limit on the number of times the ball can be bounced by the server. But, if you do bounce the ball more than one time after the score or “second serve” is called, then there must be a slight pause immediately before your being the “one bounce” that’s allowed for the serve.

Interestingly, in Canada, the rules still limit the server to only three bounces. The AARA decided many years ago that there’s no need for such a limit because the server has only 10 seconds to serve after the score or “second serve” has been called. If 10 seconds expire before the serve, then the referee may assess the server a technical foul (loss of a point) for delay of game.

The ball must also be bounced on the floor in the service zone; otherwise, it’s a fault. Furthermore, during the serve, if the ball hits any part of the server’s body or equipment (other than the racquet), the serve is lost immediately.

As I like to describe the preceding in very simple terms, it must be clear which bounce is the “one bounce” that you are allowed for the serve and when you do take that “one bounce,” the bounced ball must travel directly from your hand to the floor, and then be hit by your racquet without touching anything in between.

Q: Who has the right to the ball during a time-out? Say, for example, Player A calls time-out, but Player B has the ball and starts hitting it around. If Player A is distracted by this or just wants to hit the ball, does Player B have to give the ball to Player A? I have never heard of or seen a dispute, but thought it was interesting. Darlene A. H. Truett, Murfreesboro, Tennessee.

A: This is another one of those special issues that’s not in the rulebook – probably because it really doesn’t occur that often. But when you’ve refereed as many matches as I have, you are bound to encounter nearly everything at least once. The most notable person to claim a “right” to the ball is Lynn Adams – women’s pro champion, many times over. During time-outs, she often liked to either hit the ball or else rapidly walk around the interior perimeter of the court dribbling the ball with her racquet. It made no difference to her who called the time-out – she was determined to have the ball in the interim. Of course, her opponent sometimes wanted the ball too – especially if, as you cited, her opponent had called the time-out.

How did I handle it? Well, the first time, I admit that I was perplexed! But the next time I was assigned to ref one of her matches, I kept another ball handy so that if both persons wanted to hit a ball, they could. But I found that I had to carefully control this activity to make sure (i) that the game ball wasn’t switched (either accidentally or on purpose) and (ii) that the time-out didn’t exceed the allotted 30-seconds.

In retrospect, I believe that a better solution would have been to not allow either player to hit the ball. I really can’t think of any sport involving a ball (such as basketball, football, or volleyball), that allows the players to “practice” with or even hold the game ball during time-outs. My suggestion is that if players don’t argue over possession of the ball during a time-out, let them keep it and do as they please. However, if they can’t agree, the referee should simply hold the ball until the time-out is over.

The Final Shot: If you missed Linda Mojer’s comments in the last issue of RACQUETBALL Magazine about a few errors that crept into the rulebook published in the July-August issue, be sure to check it out! These errors have since been corrected, but a lot of copies are still in circulation. Be prepared!
Racquets and racquet string have to work together as a unit, and choosing the right string tension is one of the most important equipment decisions a racquetball player can make. It used to be a relatively easy one back in the “old days,” before the advent of oversized racquets. Way, way back, in the late ‘70s, all racquet heads were pretty much the same size and shape, and all racquets were strung between 25 and 30 lb. tension. In other words, there was a spread of just 5 lb. or 20 percent, so you couldn’t go too far wrong.

But technology doesn’t stand still, and now we’ve got a wide range of racquet head sizes and shapes, action that varies from fairly whippy to ultra-stiff, and vast differences in stringing patterns. Recommended stringing tensions now range from 25 to 60 lb., increasing the spread to 35 lb., or 140 percent, which means there’s a lot more room for error. Or to look at it in a more positive light: there’s greater opportunity for the player to “tune” his racquet to suit his playing style by altering string tension over a wider range. If you don’t like your racquet’s performance, don’t even think about buying a new one until you’ve experimented with changes in string selection and tension.

The basic equations are:
Higher Tension = More Control
Lower Tension = More Power

Strings at low tension stretch more when they contact the ball, and then quickly snap back to their initial length. This “trampoline effect” (also known as resilience, or rebound) adds power to the shot: it’s sort of like putting a spitball in a rubber band, pulling back, and then releasing it. If the racquet is strung at a higher tension, less stretch is left in the string to provide a trampoline effect.

On the other hand, tighter strings remain flatter, so it’s easier to control the direction of the ball and to impart spin on it. Bear in mind these limits, however: excessive string tension leads to frame or string breakage, and too-low tension means a total loss of both control and power.

Long strings stretch more than short ones under the same loads: in other words, they have more trampoline effect. This is the main reason why oversize racquets have more power than standard ones. Thus, we have the concept of relative, versus absolute, tension: string tension should be in proportion to head size. In general, oversize racquets call for tighter tension than standard ones to overachieve comparable playability. If you want extra control from an oversize, you’ll have to string near the top of the

String tension is set during the stringing process by stretching the string as it’s installed in the frame. String tension greatly influences the performance of the racquet. Photo: courtesy Thomas Rankin Associates, photo model: Cal Steere, Warwick, Rhode Island.
A racquet loses roughly 10 percent of its tension the day after it's strung — and that's if it's not used. The tension will drop further every time you play it. "Creep," or loss of tension, is due to stretch at the molecular level, and it's a fact of life: work with it, don't fight it. Think of stringing tension in terms of initial, or "referenced" tension. Learn what reference tension works best for you over the useful life of the string, and go with that.

Checking tension on an already-strung racquet can be done with special equipment, but it's not a very fruitful exercise. When the string becomes too loose (if you haven't already broken it), that means the molecules have stretched out considerably, and tightening up the string in the racquet won't restore its original resiliency. So don't even bother trying to measure the tension of a strung racquet: just re-string it.

The construction of the string itself also affects string tension and performance. Kevlar®, for example, is very stiff, and stretches much less than nylon under the same load, so you might want to string it at relatively low tension. Zyex® fibers resist creep better than almost any other material. How different materials are put together in the string also makes a big difference. We'll look into this subject more in future columns, so for now, just bear in mind that the proper tension for one string is not necessarily right for another.

It is always a good idea to discuss your needs with a certified racquet technician who specifically understands racquetball, but string tension is more like an exam in English than Math: there is no single right answer, and the final decision has to be the player's own, based upon his or her abilities, playing style, and preferences. If you're physically strong, you might want to add control to your game by stringing tight. Or you might want to make your shots even more powerful by stringing loose. Or you might choose something in between for a balance of control and power. Likewise with finesse players who are not so strong: you can select string tension to maximize your advantages, minimize your weaknesses, or strike a happy medium. By knowing how string tension affects play, you'll optimize your own performance and that of your racquet.
I am most pleased to update you on the progress made by the racquetball industry in its joint effort to promote our sport. The Racquetball Industry Association [RIA] was formed during the Super Show in Atlanta earlier this year and its first order of business was to create its own "Racquetball Initiative" patterned after the Tennis Industry Association Initiative.

The tennis initiative was formed in an attempt to arrest the slide in tennis participation worldwide – which had shown a decline in its player base of 44% in three years.

Although its numbers are not as dramatic as that of tennis, the racquetball population has remained fairly static over the past three or four years. But our sport also has the advantage of access to its current market, since over 85% of the playing population pays court fees to play. This also makes our player base much more committed than in tennis, where 85% of participants play for free on municipal courts.

The RIA realized that its future lies with the clubs and the success of racquetball as a bottom line profit item for club management. In early discussions, these major areas were identified as priorities: a) immediate contact with all court clubs to show that racquetball is viable and profitable (to reverse the trend of court removal in favor of other activities); b) image/public relations; and c) retail outreach and promotions.

To address the highest court club priority — and with participation by virtually all of the major players in the sport — $50,000 has been raised to date under the guidance of Brad Patterson of the Sporting Goods Manufacturer's Association and Rob Ahrensdo of Ektelon. In addition, a significant contribution to this effort was made by the International Health and Racquet Sports Association [IHRSA], under the guidance of Executive Director John McCarthy.

The RIA also agreed to support the efforts of the ACRA by allowing this affiliated association to retain the full amount of membership fees collected from new and renewing collegiate members to offset the costs of their various developmental projects. Since the agreement in October of 1994, the ACRA has retained over $35,000 in collected membership dues to support their programs.

The AARA Board of Directors has adopted the "Mastery of racquetball" program by Tom Travers and Larry Adams as the official instructional curriculum at the collegiate level. This video and workbook package is available to all college physical educators by calling 216/650-9363. "Mastery of Racquetball" is the first comprehensive instructional package that has been offered to the college market.

1996 AARA LEADERSHIP CONFERENCE
The annual conference dedicated to the leaders of our sport is scheduled to take place in Colorado Springs at the U.S. Olympic Training Center on January 11-14, 1996. The conference is open to our State Association Presidents and industry leaders.

MEDIA WATCH
Did you know that Tom Cruise, Garth Brooks, Jack Ham, Kathleen Turner, Al Olier, Dion of the Belmonts, Eddie Murphy and Joe Theismans all play racquetball to stay fit? In the 1996 Service Merchandise catalog there is twice as much space dedicated to racquetball than to tennis... In Michael and Janet Jackson's video "Scream" Michael plays futuristic racquetball - catch it...it's great.

INTERNATIONAL
Racquetball will be a full medal sport in the 1999 South Pacific Games... There are two new racquetball courts at the Pacific island resort on the South Pacific island of Guana... The Ektelon/RF World Championships dates have changed to August 9-17 at City Square Athletic Club in Phoenix... Over 20,000 Australians play racquetball on squash courts. It's called Australian Rules Racquetball - sound familiar...
Our group buying power pays off for you
You can now support our projects such as Olympic Dream and Junior National Team and save money on your long distance bill—at no cost to you. Our Members’ Long Distance Advantage program saves you up to 25% on your long distance calls and a portion of each call goes to support AARA. There’s no cost to join and there are no monthly fees. Take advantage of this new member benefit today.

A New Way To Support
AARA

Racquetball is Profitable— from a single court, a club can realize $95,000 net profit in one year. A workbook will accompany the video which will be a “how to” for programming, featuring socials, leagues, mixers and tournaments to achieve this profit figure.

And that’s not all that’s going on. Ektelon approached the AARA to help run a series of racquetball mixers throughout the U.S. Under the guidance of six-time national and current World Champion Michelle Gould the project is designed to attract new players to the sport in select clubs regionally throughout the U.S. The objective is to introduce current fitness club members to racquetball in a fun and friendly atmosphere. The major theme of the program is “racquetball is fitness and fitness is racquetball.” We’re a sport first, with fitness as a by-product of competition. The combination is perfect and can’t be surpassed in the fitness industry.

By the way, have you seen Ektelon’s new fitness poster that has been distributed to over 2000 clubs in the U.S.? It maintains the fitness-racquetball theme. If your club hasn’t put it up yet, ask for it.

So, in under a year’s time, four major promotions are underway and court club attitudes are changing. This is the first initiative for racquetball since the mid-seventies. It’s great to be a part of it.

BOARD MEETING HIGHLIGHTS
• Accepted the 1994-95 audit submitted by Ken Waugh and Associates.
• Agreed to publish AARA Due Process Procedure in an upcoming issue of RACQUETBALL Magazine and the next rulebook.
• Revised the U.S. Coaching Procedure submitted by the Coaching Committee. 
• Awarded $500.00 scholarships to Kim Russell, Kori Grasha, John Stanford, Tricia Boots.
• Accepted the scholarship rating system.
• Turned down any new rule changes for consideration in 1996.
• Requested that the National Rules Committee revise the round-robin tiebreaker system.
• Established firmly that the third weekend in April would be the AARA Regional Weekend beginning in 1997.
• Selected USOC Male Athlete of the Year—Michael Bronfeld; Female Athlete of the Year—Michelle Gould
• Established a task force to re-examine allocation of AARA current finances and re-structuring of the national office towards establishing a more dynamic position for the AARA and creating new life and energy for the sport in the U.S. Areas of change to include:
  A) Large major events with or without the necessary sponsorship;
  B) International involvement in future Olympic and regional games;
  C) Marketing and sponsorship services.

November – December 1995
FIRST EUROPEAN JUNIOR CHAMPIONSHIPS HELD
By René Henemann

After three exciting days of racquetball in Zoetermeer, the European Racquetball Federation was very proud and pleased to hand out 39 awards in nine categories to the best juniors in Europe. The first European Junior Racquetball Championships were held in Racketcenter De Leyens in Zoetermeer in the Netherlands. Forty-six juniors from Denmark, Germany, Great Britain, Ireland and the Netherlands took a shot at the First European Juniors title in Boy’s 12 & under, 14 & under, 16 & under, 18 & under, doubles and girl’s 14 & under, 16 & under, 18 & under and doubles. Unfortunately France withdrew their four juniors only 24 hours before the start of the event. The ERF is committed to having those four French juniors and maybe more in the second edition of the European Juniors.

The opening ceremony was conducted by René Henemann and the director of the Zoetermeer Sportscouncil, Mr. Hans Kelder. The latter performed the official opening and served the first serve of the championships. The first three matches of the weekend started at 10:00 a.m. sharp.

On day one, after the first few matches the experts could already identify some of the talented players and handpick some of their favorites for a title. Before the start of the first European Junior Championships it was nearly impossible to make a seeding in each category. It was only clear that Germany and Ireland, with the best junior programs in Europe, would probably have the favorites among their team members. Not knowing the strength of the other countries however, made it look more like a lottery.

The kids took each match very seriously. At first some of them had to shake off some nerves, but this did not take long. In some beginning matches the difference of level of play was too big for some. In others, the strength of both players were about equal and tough matches progressed. We even saw some tiebreakers in the first rounds. An occasional upset and an unexpected loss was even cause for some tears. Gradually the better players emerged and advanced into the semi-finals.

On the third and final day of the event we saw quite a few exciting semis, finals and playoff matches for third and fourth place.
During the last match of the championships in the boy's 18- between Peter Rakowski of Germany and Pat Hanley of Ireland the excitement was big and the crowd went wild. A large crowd of people packed the viewing area to watch this excellent match, driving a few to step up on the radiator of the central heating and watch the match from there. A few moments later the weight on the pipes was too much and one pipe broke off. Water flooded some of the viewing area and the match had to be continued on another court. The fire brigade came and together with a central heating mechanic they temporarily fixed the problem within thirty minutes. Luckily, this unfortunate mishap did not interfere with the championships in any way. Peter Rakowski just edged his Irish opponent Pat Hanley in the tiebreaker, with the score of 14-14, 10-15, 11-7.

At the end of the first junior Championships Ireland took home five titles, Germany had won three titles and one title remained in Zoetermeer (= Sweet Lake City) in the Netherlands.

Except for the Dutch juniors, all juniors and two coaches stayed in the gym of the Orange Nassau College, located only seven minutes walk from Racketcenter De Leyens. The other coaches and parents were hosted in private homes. Hotel rooms within a radius of about 40 miles are hard to get in the western part of the country around the Easter weekend. Having most of the juniors in the gym created some bonds between them from the first night. On Saturday evening a disco was arranged for the participants, where everybody enjoyed themselves tremendously.

**Final Standings 1st European Junior Championships**

**BOY'S DOUBLES:** 1. Rakowski/Frank, Germany; 2. Bertels/Klippel, Germany; 3. Hanley/Boyece, Ireland.

**GIRL'S DOUBLES:** 1. Neary/Corcoran, Ireland; 2. Beecher/Dunlea, Ireland; 3. Tadhgig/O'Mahony, Ireland.
### III Sudamericano De Racquetbol

*Sunset Racquet Club, Quito, Ecuador: August 8-12, 1995*

#### Women's Doubles
1. Juan F. Gomez, Colombia......... 20 pts.
2. Pablo Jafre, Chile................. 18 pts.
3. Fabian Apa, Argentina............ 13 pts.
4. Ivan Villegas, Colombia........... 10 pts.
5. Oscar Justiniaino, Bolivia....... 8 pts.
7. Gerardo Gil, Bolivia............... 6 pts.
8. Mario Villacreses, Ecuador...... 5 pts.

#### Men's Doubles
1. Juan Villacreses, Ecuador........ 20 pts.
2. Juan Pablo Cleros, Bolivia....... 16 pts.
3. Clemente Car. San, Colombia..... 13 pts.
4. Mauriolo Avelaez, Colombia...... 10 pts.

#### Men's Open
1. Juan F. Gomez, Colombia......... 20 pts.
2. Juan Pablo Cleros, Bolivia....... 16 pts.
3. Clemente Car. San, Colombia..... 13 pts.
4. Mauriolo Avelaez, Colombia...... 10 pts.

### COPA Sudamericana Country Results

#### Women's Open
1. Cintya Salazar, Bolivia......... 20 pts.
2. Angela Grisar, Chile.............. 16 pts.
3. Loreto Baniaga, Chile............ 13 pts.
4. Lucia Sapere, Argentina......... 7 pts.
5. Yaka Parada, Bolivia............. 8 pts.
6. Amanda Kurzberd, Argentina..... 7 pts.
8. Bertha Muniziega, Chile........ 5 pts.

#### Men's Seniors
1. Jose Cueva, Ecuador............... 20 pts.
3. Alejandro Herrera, Colombia.... 13 pts.
4. Sergio Oreillana, Chile......... 10 pts.

#### Men's Doubles
1. Grisar/Barriga, Chile........... 20 pts.
2. Sapera/Kurzberd, Argentina..... 16 pts.

#### Men's Juniors
1. Jose Cueva, Ecuador............... 20 pts.
3. Alejandro Herrera, Colombia.... 13 pts.
4. Jose Vireira, Bolivia............ 10 pts.

#### Men's Seniors
1. Maggi Osvaldo, Argentina........ 20 pts.
2. Mario Villacreses, Ecuador....... 16 pts.
4. Jose Vireira, Bolivia............ 10 pts.

#### Men's Senior Doubles
1. Maggi/Munoz, Argentina........... 20 pts.
2. Villacreses/Paez, Ecuador....... 16 pts.
3. Orellana/Avino, Chile............ 13 pts.
4. Vireira/ViRaque, Bolivia........ 10 pts.

### COPA Sudamericana Country Results

#### Women's Open
1. Bolivia........................................ 84 total pts.
2. Chile........................................... 82 total pts.
3. Argentina..................................... 72 total pts.
4. Colombia...................................... 33 total pts.
5. Ecuador........................................ 57 total pts.

#### Men's Open
1. Ecuador........................................ 101 total pts.
2. Argentina..................................... 40 total pts.
3. Colombia...................................... 36 total pts.
4. Bolivia......................................... 35 total pts.
5. Chile........................................... 23 total pts.

### NATIONAL WOMEN'S SENIOR/MASTERS RACQUETBALL CHAMPIONSHIPS

*January 25-28, 1996*

#### Royal Athletic Club

1718 Rollins Road
Burlingame, California 94010

### Deadline & Fees
January 19, 1996 - $65.00 per entrant (one division only). No telephone entries or entries without payment accepted. Refunds will be issued if the cancellation is received before the entry deadline. Make checks payable to Racquetball Plus.

### Host Hotels
- Doubletree Hotel @ 800/222-TREE ($79, sgl/dbl); Radisson Hotel @ 800/333-3333 ($65, sgl/dbl); Millwood Inn @ 800/345-1375 ($51, sgl/dbl); Crown Sterling Suites @ 800/433-4600 ($102, 2 rm suite w/breakfast); Red Roof Inn @ 800/THE-ROOF ($49.95, sgl/dbl).

### Travel/Booking Information
Hotels and club are approximately 10 minutes from SFO and 12 miles from downtown San Francisco. If you fly into San Jose or Oakland airports, you will be approximately 45 minutes away from the club and hotels. Shuttles from hotels to club will be scheduled complimentary airport shuttles are offered by host hotels.

### Format & Rules
Round robin flights with advance into playoff round, 2-3 games to 11, depending on size of division. Self-officiated. AARA rules govern, including the mandatory use of approved, lensed eyewear. AARA membership required to compete. Awards will be given to the first four places in divisions with two or more flights, and to the top three finishers in divisions of eight or more. Souvenir cardigan sweater to each participant.

### Hospitality
Provided throughout, plus Saturday night banquet. Hospitality pass for non-competitors, $20.00; Saturday evening banquet pass, $10.00.

To receive an official entry form, contact Jack Hughes or Terry Rogers @ 415/349-9533 (home) or 415/697-9162 (days). For WSMRC membership and be added to the mailing list, contact the Women's Senior/Master Racquetball Council via Kendra Tutsch, 110 South Midvale Blvd., Madison, WI 53705 @ 608/233-3863.
MEET BENNY GOODSPOUT™—FITNESS CLOWN.
IT ALL BEGAN WITH RACQUETBALL
By Janet Arbeter

Everyone, it seems, loves a clown. Universally accepted by young and old alike, they symbolize fun and laughter. Clowns allow us to laugh at ourselves. And for the moment, remove us from the stress of everyday life.

Like every weekday morning at 6:15 a.m., the usual group of guys assemble in the club lobby to prepare for their racquetball workout. After stretching and some small talk, they break up into pairs. Ben Ellis and his partner take to the court to play their doubles match. The opponents serve first. As the ball is served, becoming a blue blur in mid air, Ellis positions himself to return the volley. He turns to face the rear of the glass walled court and with his back to his opponents, bends over his knees and follows the swing through his legs, without missing a beat. He totally confuses his opponents and scores the point. To the delight of the small but dedicated early morning audience.

With all of the emphasis on senior fitness, Ellis, at 59 years, should be the poster person, given his statuesque six foot, well developed 200 lb. physique, coupled with the stamina of a player half his age. Eternally optimistic and friendly, he looks much younger than his actual years. He is a skilled athlete, especially at racquetball. A competitive person by nature, he takes his game seriously.

At a recent club tournament at McDermott’s Health and Racquet Club in West Chester, Pennsylvania, Ellis and his partner Carl Vaccaro played Wally Ruiz and Julie Siskind. They traded points in two games so exciting that the spectators were nearly as exhausted as the players. No big deal, you say, except that Ruiz is 29, half Ellis’ age. Ruiz, no stranger to the circuit, was the current A Singles Pennsylvania title holder and nationally, he ranked third. Ruiz says that “Benny has the ability to rank nationally in his age category. I would pit Benny against anyone in his age category. I fact, my money is on Benny.”

Benny plays with a presence that would disarm even the most stalwart competitor ...

After a few minutes of play, Ellis grabs the waistline fabric of his navy and white polka dot shorts. The elastic rotted and apparently stretched out, leaving poor Benny with the task of holding on to his shorts. He tried everything, like hiking the shorts up (to where?), to rolling them under his white briefs. You have to wonder just what he was thinking! Nothing
worked short of a safety pin which eventually appeared on the scene. And all the while Benny keeps playing, as though nothing else is going on.

Ellis learned early on that regimen and dedication pay off. After graduation from high school, he enlisted in the Army. He started his military career as a private, moved up through the ranks, and was discharged as a first lieutenant. Ellis, a self-proclaimed soldier at heart, says, "The Army taught me discipline, organization and how to get along with people."

Benny's motto, "Work hard, play hard," carries over from his Army days to his dynamic insurance career and racquetball game. In fact, Ellis attributes his performance as a top State Farm producer, for which he holds the CLU (Chartered Life Underwriter) and LUTC Fellow (Life Underwriters Training Council) professional designations, to racquetball. For Ellis, racquetball features the best of both worlds; an all-encompassing aerobic sport that joins forces with his competitive nature.

But take heart. Ellis only started playing the game at age 45 or so. Ellis felt stuffed and uncomfortable. His business lunches and lack of exercise collided and he felt uncomfortable wearing pants that became increasingly tight. He was busy running his business and his life and failed to give his body the attention it deserved. It was only later, after starting to play racquetball, that he realized the sport only served to improve his overall performance.

While Ellis is serious about the game, he actually plays to have fun. The camaraderie of the players is just as important to Ellis as the competitive or work-out incentives. He says racquetball is a sport that allows no excuses. The game takes place year round indoors, regardless of the weather. "Because you are part of a group, you give each other encouragement and incentive. And if you keep it more fun than competition, the encouragement will come back. Racquet sports and the aerobic workout it provides is without a doubt the best, probably the finest fitness a person over 50 could get into."

Ellis observed that many seniors seem to leave the game. He questioned whether it was due to burn-out, the loss of the spirit of the game, or due to physical reasons. Ellis attributes racquetball as a fun way to participate in preventive medicine. "It keeps the vascular system, circulatory system and lungs healthy and keeps the skin young. There is no way to avoid looking old unless you have a fitness program." Ellis is Ruiz's role model. "To look and move as good as he does, Benny is very dedicated to fitness. I would like to look like him when I am Benny's age," Ruiz says.

Ellis, a southpaw, serves next. He dribbles the ball with his racquet, once, twice, maybe four times in all. Just enough times to put the players on edge while they anxiously await the serve. Ellis turns his face and smiles at the opponents; they laugh nervously. Cautiously, they keep their eyes on the ball. Ellis finally serves. He gets into position to volley. He raises his leg parallel to the floor and in a flash, returns the ball through his raised leg. Somewhere between the left-handed serve and raised leg, the stunned opponents were last seen searching for the ball.

As a boy growing up in Altoona, number 15 of 16 kids, Ellis says there were no organized sports before junior high. He played some football in high school and along the way played stickball and swam in the city pool. He remained active in local available activities where cost was not a factor.
Today, in addition to his daily racquetball workout, Ellis rounds out his fitness program by cross training. He plays tennis and golf, is a certified scuba diver and is currently involved with his modified slow pitch softball team, the “Legends.” This group of energetic seniors comprise two groups of men, 50+ and 60+; they play other area teams two times weekly throughout the summer season.

His dynamic form in motion, comedic movements and duds make Ellis a likely subject for fitness promotion. Last fall, Ellis agreed to a photo session aimed at illustrating racquetball and fitness articles. After reviewing the photos, we decided to take the project one step farther. We dressed Ellis like a “Court Jester” and tried another shoot. Ellis’ own colorful shorts formed the basic costume. Makeup and a child-sized, multi-colored, frizzy wig completed the look. The photos depicted a funny and convincing racquetball clown.

Ellis and a collaborator decided that the concept could be expanded, to be used as a teaching/entertainment tool, especially for but not limited to young children. Benny Goodsport™, fitness clown, was the result. Ellis thought a clown was the perfect catalyst to introduce the young to the sport. “A good player attracts attention to the game and can teach the kids to play. It’s inspiring to see young people start the game; it teaches the value of competition for life and helps them feel physically comfortable with themselves,” says Ellis. Benny Goodsport, dressed in colorful sports attire, will certainly warrant attention. What separates Benny Goodsport from others in a position to act as a role model is that Ellis is an everyday real person, trying to reach everyday real people. Not everyone, after all, can relate to sports celebrities.

Giving something back to others is not new to Ellis. He has a strong sense of community. For the “Legends,” Ellis serves as team manager and sponsor, providing the team with spiffy uniforms. Ellis is also a Shriner, a 32nd degree Mason and president of his business and residence condominium associations.

Ellis believes that long time players benefit over the long haul, but those new to the fitness scene benefit because they are involved. In his experience as an insurance professional, Ellis has observed that the ages of 40-45 are pivotal years in the life of a man. Fitness decisions made during that time period will determine if an individual will live long enough to enjoy the retirement years. According to Ellis, “Benny Goodsport™ would like to symbolize the spirit that will help wake up Americans to the need to pay attention to physical and mental health.” Ellis, with a twinkle in his eye, the embodiment of the fitness clown, Benny Goodsport, says “Fitness is Fun! Fitness is for everyone!”
capped her 18 months of playing racquetball by winning the National Championship in Mixed Doubles with Steven Kaiman and placing third nationally in singles and girl’s doubles.

Has Lindsie neglected her violin? In March of this year, Lindsie auditioned for a magnificent project established by the Disneyland Corporation in California. For the past four years, Disney has brought in 75 youngsters from all over the country to Los Angeles and who must be 12 years of age or younger to perform in a symphonic orchestra. The youngsters enter into a camp-like atmosphere and are housed in dorms at a university for 11 days. They rehearse six hours a day and the activity is culminated with a concert on Sunday which is televised to be broadcast on the Disney Network. Lindsie was chosen as one of the 75 performers and was the only ten-year-old to be placed in the first violin section and ultimately was seated in the fifth chair, a terrific tribute to her outstanding talent. The concert was televised on the Disney Network on August 24th. The TV production crew took videos of her hitting a racquetball to include in short features of the kids in their other activities.

Know what this 10 year old was doing from April until July? Practicing the difficult music Disney sent her to learn, taking her normal violin lessons and practicing, taking lessons from her racquetball instructor, playing and practicing and participating in racquetball tournaments and going to school and doing her school work. Her ability to focus 100% on what she is doing has contributed greatly to enhance her natural gifted talent. What’s ahead for this gifted wonderkind? Her goal is to win the Junior Racquetball singles next year. I wouldn’t bet against her.

U.S. JUNIOR TEAM
by Jim Hiser

The U.S. Junior National Racquetball Team Program has been in existence for five years, during which it has matured and gone through many changes thanks to the input of parents, athletes and coaches. And although the program has been successful, there are still many misconceptions regarding its purpose.

Created to provide a goal for junior athletes at the state, regional and national level, the program is not based strictly on racquetball performance. Selection criteria include academics and citizenship, not only racquetball participation and skill.

To become involved, any junior competitor aged 14-18 can seek a state-level nomination by contacting their state organization for paperwork, completing it and submitting a formal application.

Once an individual is chosen by their state, a second, regional review selects regional candidates who are invited to participate in the U.S. National Junior Team Trials held annually at the Olympic Training Center in Colorado Springs. In its final stage at the trials, the selection process is divided into four areas: 1) grade point average; 2) tournament results; 3) physical fitness evaluation; and 4) racquetball knowledge, instructional ability and team leadership.

This diversity of qualifications – not only court skills – are necessary to fulfill the numerous requirements put on these junior athletes after they qualify for the team. The primary duty of junior team members is to serve as goodwill ambassadors for the sport...a duty that is fulfilled at the state, national and international level each time a
U.S. Team athlete participates in an event.

At the same time, the junior team was not developed with the intention of winning international events. Although competition and victory are certainly goals of the team after it is named, the selection process itself does not take specific competition goals into consideration.

Since its inception the junior team has travelled abroad each year to instruct foreign athletes in racquetball training procedures and skills. Much more so than winning international events, it is absolutely necessary that U.S. athletes possess the necessary skills to interact, participate, inspire and teach others.

Academic requirements are included to stress the importance of education and to encourage juniors to maintain a certain level of scholastic involvement as they set their athletic goals. Since so many candidates are equal in all the other areas of evaluation, grade point average is always the “tiebreaker.”

The program continues to evolve. Each year athletes and parents meet with coaches and administrators to evaluate and assess the benefits and direction of the program.

The junior team approach clearly differs from the adult team, for which individuals are selected solely on ability with the primary goal of winning international events. The junior team program is much more complex and, since its inception, many great athletes have become better students, and many great students have become better athletes.

As long as these type of results continue to be produced, the Junior Team Program will continue to be successful.

PROGRAMS & INSTRUCTIONAL ...

TRANSITION MAKES CHANGES

Transition Racquet Sports recently announced that former president John Hooghe will step aside and let his wife of seven years, Elaine, take over the internal workings of the company. Pleased with the decision, John said “Elaine certainly has the knowledge and what it takes to be in control.” She also knows racquetball after having captured multiple national titles. This also frees me to take on the larger challenge of full time marketing, promotions and design, the things that made T.R.S. in the first place.”

As the official racquet of the AARA, T.R.S. also reiterates its commitment to amateur and grass roots development, by opening up its advisory staff program for the 1995-96 season. “We would like to help out more teaching pros in various parts of the country,” said Elaine. Clinics will also be offered throughout the U.S. and Canada featuring IRT touring pros Tim Sweeney and Dave Johnson. Advisory staff applicants may contact T.R.S. directly at 614/457-4076, Monday through Friday, 9:00 a.m. - 5:00 p.m.

VIDEO, MAGAZINE AND MIXER PROGRAM FROM EKTELEON

Ektelon is marketing the message that racquetball is fun, exciting and great fitness with three innovative vehicles—a new video, a new magazine and a new grassroots program for racquetball beginners.

“aracketball Workout” is a ninety minute video that provides a complete three month training program broken down to four key areas: cardiovascular exercise, muscle strength, muscle endurance and flexibility. Top Ektelon pros Michelle Gould and Andy Roberts demonstrate all the steps to a complete racquetball game, from how and where to serve, to position on the court and how to strategically hit shots. The tape also features professional fitness trainer Dan Oberski, and world renowned fitness expert Dr. Jack Groppel. The video retails for only $19.95 and is available at your local racquetball club or by calling 800/283-2635.

“Total Racquetball and Fitness,” is a free magazine filled with articles on how to add variety to your workout, six steps to choosing the right racquet, answers to the 75 most asked questions about racquetball, and a product catalog featuring the latest equipment and technologies. The publication is available in sporting goods stores, health clubs or by calling 800/283-2635.

Ektelon and the AARA are sponsoring a “mixer program” designed to introduce health club members to racquetball. In selected cities nationwide, mixer programs will invite people to learn the sport basics, including rules, basic strategy and needed equipment. Team Ektelon players will run the programs, encouraging people to take to the courts for a “hit for prizes” contest and use an “open court” policy to play a few games. Ektelon’s top female player Michelle Gould has been appointed national event coordinator for the program, and will work with the AARA and local coordinators to organize the logistics of the program in each city. The mixer program is slated to begin in October and will reach twenty “mixers” in ten cities.

NEW MATCHUP SOFTWARE

Sports clubs often need to match up suitable players for tennis, racquetball, and other activities. Matchup meets that need by storing information about people’s activities, skill levels and times when they are available. When a matchup is required, all people meeting the desired criteria (activity level, time) are listed, with their phone numbers. The results are shown real-time on the screen and/or in printed reports. Matchup runs on IBM-PC compatible computers, with or without hard disk. For more information, call Win at 714/894-8161. Or, write to WIN Sports, 15892 Redlands Street, Westminster, California 92683-76120.

PENN AND WORLD SENIORS SIGN THREE-YEAR ACCORD

Sheri Norris of Penn Racquet Sports and Gary Mazaroff, Executive Director for the World Senior Racquetball Championships, recently signed a three-year agreement to name Penn as the official ball of the annual event. Penn has been the official ball for the WSR since the tourney’s inception in 1985, and will continue as the event’s official ball through 1997. The World Senior Racquetball Championships is the largest racquetball event in the world for age group players over 35. It is also the number one fundraiser for racquetball’s international development.

TEAM TOUR GEAR BY PROKENNEX

ProKennex has introduced Team Tour Gear, a multi-faceted player program designed to promote growth and exposure for the sport. Team Tour Gear will utilize a staff of players throughout the country to create positive exposure for racquetball in the court clubs. ProKennex professionals Mike Martinez and Steve Lerner will make selections for the team from recommendations provided by the players and club management. Players interested in joining Team Tour Gear should call

COMPLETE VIDEO RACQUETBALL SUCCESS PROGRAM
Tom Travers, premiere teacher, coach and two-time national champion, has developed a comprehensive video racquetball success program for all skill levels. Mastery of Racquetball™ is taught by Travers and features Cliff Swain, the number one pro player in the world. The program includes five video modules of 30-50 minutes each, a workbook, and laminated Practice & Progress Cards™ to take to the court for drills, tracking “mastery” performance, and for setting game objectives and strategies. The step-by-step instructional package teaches proven techniques and strategies, and the workbook reviews and reinforces the video instruction to elevate the player’s knowledge and capabilities. The complete Mastery of Racquetball Success Program is $169. To order contact: Lawrence Adams, Inc., 46 Ravenna Street, Suite B-6, Hudson, Ohio 44236 or phone 216/650-9363, fax 216/655-2466.

PENN DONATES OVER 385,000 RACQUETBALLS
Penn Racquet Sports, America’s #1 ball company, continues to support racquetball programs all over the U.S. In keeping with their commitment for community involvement, Amy Wishingrad, Penn’s national promotions manager said, “I am proud to announce that in 1994, Penn donated over 385,000 racquetballs to various racquetball programs worldwide.” Among those events receiving support this past year were: AARA State Programs; AARA/Recreational Racquetball; AARA State Circuits; Junior Programs; Inner City Youth Programs; Intercollegiate.

SPALDING INTRODUCES NEW RACQUETBALL LINE
Spalding Sports Worldwide introduced six new racquets and a new and improved Assault Lite to its 1995 Assault Line. The new line includes the Enforcer, Silencer, Grafight, Felon, Comp and Alliance frames. Spalding’s new, patented Reverse Sunburst string pattern, featured in the top four graphite models of the new line: The Enforcer, The Silencer, The Grafight, and The Felon, has re-invented the traditional “sweet spot.” The new Reverse sunburst string pattern has increased the string density at the top of the racquet, expanding the sweet spot toward the top of the racquet, creating the “Mean Streak.” The “Mean Streak” delivers better power transfer, more control and overall better play where prof and expert racquetball players need it ... at the top of the racquet head.
ASHAWAY INTRODUCES SUPERKILL® 17 STRING
A new, thinner racquetball string from Ashaway Racket Strings offers lively response for players looking to maximize the velocity of their shots. With a diameter of just 1.25 mm, 17 gauge SuperKill® 17 string offers greater resiliency, while its abrasion resistant wear layer assures good durability. The string features a multi-stranded monofilament core, which flexes and rebounds quickly to deliver maximum power to the ball. The twisted cover layer provides “bite” on the ball, and adds resistance against notching for enhanced string life. Recommended string tension is 20-45 lbs. to ensure responsiveness. Ashaway Racket Strings are made by Ashaway Line & Twine Mfg. Co., the only U.S.-based manufacturer of string for tennis, racquetball, squash and badminton. Ashaway is the official string of the American Amateur Racquetball Association. For additional information contact: Ashaway Line & Twine Mfg. Co., P.O. Box 549, Ashaway, Rhode Island 02804 or phone 800/556-7260 or fax 401/377-9091.

WILSON INTRODUCES RADIUS™ WITH POWER BRAID
Wilson Racquetball’s new Radius racquets with Power Braid combine two technologies in a series of three championship frames. Patented Radius technology creates a unique circular cross-section that virtually eliminates racquet torque at impact, reduces drag, enhances racquet maneuverability and increases swing speed. Power Braid is a Wilson proprietary technology that helically interweaves rows of high modulus graphite throughout the frame to significantly stiffen it for in maximum power, uniform responsiveness, and durability. The Radius Series with Power Braid includes three racquets: the 9.9, 9.5 and 9.1, which vary in stiffness, material composition and head shape to meet the performance demands of different players. Suggested retail prices for the Wilson Racquetball line of performance frames range from $69.95 to $199.95. For retailer information, contact Wilson Racquetball at 7670 Trade Street, Suite B, San Diego, California 92121 or call 800/272-6060.

LESS SHOCK, MORE CONTROL FROM EKTELEON
Ektelon has announced the pending availability of the new Catalyst racquet, which features a patent pending grip system and a patented shock absorbing handle system designed to allow you to hit harder shots with less shock and more control. The first-of-its-kind clear Vision Grip™ has more surface area contact than traditional grips, which translates into a better, stronger grip, allowing players to swing harder without worrying about losing control of the racquet. Another key element is the patented shock absorbing system of the inner part of the racquet handle, or pallet. Other racquets contain wood and foam, but the Catalyst’s pallet is made of thermoplastic rubber which, combined with elastomeric throat grommets to
dampen string vibration, decreases racquet vibration while allowing you to increase your power and speed. The Catalyst retails for $250.

**BALLS & GLOVES**

**NEW PREMIUM SELECT RACQUETBALLS FROM EKTELEON**

Ektelon recently announced the availability of their Premium Select racquetball. The new ball offers better performance and durability, is responsive and lively, yet it isn’t too fast for the average player. With its optimum-tracking optic blue color players can pick up the ball easier and react quicker. The suggested retail price is $2.99 for a 2-ball can.

**WILSON ENTERS BALL MARKET**

Wilson Racquetball's entry into the ball market offers Ultra®, a ball that delivers a predictably true bounce every time. The ball's exclusive rubber compound is uniquely formulated by Wilson engineers for consistent playability. Approved by the AARA for all sanctioned tournament competition, Ultra® offers exceptional durability backed by Wilson’s “no questions” guarantee. If any Ultra® racquetball fails before the label wear off, Wilson will replace it with two free Ultra® racquetballs. For additional information on Ultra®, or the company’s other quality racquetball products, contact Wilson Racquetball at 7670 Trade Street, Suite B, San Diego, California 92121 or call 800/272-6060.

**HEAD SPORTS INTRODUCES WEB-PLUS GLOVES**

Head Sports' innovative “Web Plus” glove sports a raised silicone ski tip web pattern in the palm for a better grip and stylized appearance. The Web Plus is made of a revolutionary material called Escaine that delivers a comfortable fit. The Sensation Pittards, Conquest Pittards, Radical Tactified Strip and Maverick Cabretta are all available in Cabretta leather with rubber finger pads for protection. Each model has clear differentiation and image oriented packaging. The Head Web comes in a synthetic leather and the Renegade is constructed of premium goatskin.

**EKTELEON INTRODUCES COUGAR**

Ektelon has just added the new Cougar leather glove to its line, featuring Pitards leather in a unique dimple pattern that absorbs perspiration quickly, yet keeps the hand cool and comfortable. Players will retain the sensitive racquet feel without tack, allowing quick grip changes. The glove also has a new terry wristband and tab closure design that allows for maximum wrist flexibility with minimum resistance. The Cougar comes in sizes XS-XL and retails for $16.95.

**GET ON THE BALL WITH YOUR LOGO OR COMPANY NAME**

If you want to make an impression, consider Penn Racquet Sports exclusive imprinted racquetballs. Your logo, company name, or special event can be actually printed right on the ball - a hit with players and collectors alike. Imprinted high quality Ultra-Blue racquetballs offer a different spin on your promotion, fast. For more information call 800/BUY-PENN.

**SHOES**

**NEW COURT SHOE FROM HI-TEC**

HI-TEC Indoor Sports, U.S.A., Inc. recently introduced its full line of indoor court shoes, after last season’s worldwide demand exceeded supply. The world’s number one selling indoor court shoes, HI-TEC models are designed specifically for the sport for which they are intended. The Vari-Width lacing system allows you to customize the fit of the shoe to your foot whether you have a wide foot or a narrow one. The “Cadre Form” technology absorbs and disperses the shock associated with indoor court surfaces, protecting your foot form excessive jarring forces. Adequate toe box reduces risk of toe and nail problems. Most of the world’s finest players are wearing our court shoes including the Squash World Champion Jansher Khan. For further information call 800/HITEC10.

**WILSON'S NEW SPYKES INDOOR COURT SHOES**

Wilson Racquetball introduced a new product category with the recent debut of Spykes, a court shoe developed for racquetball, squash and other indoor sports. From the bottom up, Spykes high performance footwear is designed, engineered and crafted specifically to meet the player's need for traction, stability and shock absorption. The shoes' unique tread design grabs the floor with over 175 contact points per foot for added stopping and gripping power. The new court shoes are available in 3/4 cut, with a suggested retail price of $54.95, and a low cut model priced at $49.95. For additional information on Spykes or the company's other products, contact Wilson Racquetball at 7670 Trade Street, Suite B, San Diego, California 92121 or call 800/272-6060.
RACQUETBALL SOFTWARE

FOR WINDOWS

Computerize your next tournament. Many standard features including most draw formats, no conflicts, many reports, draw sheets, player database, special start times for players and events, seeds and mailing labels. BC Products: 602/905-1837. Specializing in sporting event software for Windows.

RACQUETBALL SPORTS SOFTWARE

FIRST COAST PROMOTIONS

We want to help promote the sport of racquetball! Lowest prices in the nation on t-shirts, promotional items for racquetball leagues and tournaments. Call Norm Blum at 1/800/762-4653.

OWN YOUR OWN COURT!

20x20x40 racquetball court for sale. Cost $34,000.00 ... will sell for $17,000.00 or best offer. Complete with 4x8 formica (industrial strength) walls, ceiling, lights, and steel columns for the entire construction (floor & exterior not included). The court is presently dis-assembled and stored in our warehouse, waiting for the right person! Call 717/563-2308.

BUSINESS OPPORTUNITY

National racquetball champion and fitness consultant looking for business partners to capitalize on trends in fields of fitness, prevention and sports nutrition. Entrepreneurial athletes, business people, medical professionals and others can benefit without capital risk or geographic limitations. Interested? Call Marcy Lynch at 1-800/473-9743.

FOR THE MATURE PLAYER...

Two "special interest" organizations offer competitive opportunities for men and women over the age of 35. The National Masters Racquetball Association hosts four events annually for both men and women, and the Women's Senior/Master Racquetball Council conducts the Women's Senior/Master National Championships in February of each year. Both organizations generate newsletters and maintain special mailing lists to keep their members informed. If you would like to join either association, or would like more information, please contact: Paul Banales, National Masters Racquetball Association (NMRA), 4201 North 83rd Drive, Phoenix, AZ 85037 [602/849-6298] or Kendra Tutsch, Women's Senior/Master Racquetball Council (WSMRC), 110 South Midvale Blvd., Madison, WI 53705 [608/233-5865].

RACQUETBALL Magazine is the only publication in the industry to deliver the goods — to the reader and for the advertiser. For a complete media kit, including 1996 ad rates, specifications and deadlines, call David Senick or Becky Maxedon at 719/635-5396.
Announcing the revolutionary:

American Racquetball Racquet™

Racquet aligns with player’s arm! — shifting handhold and twisting hand, wrist, and arm have been eliminated! The result is: **COMFORT • CONTROL • ACCURACY • AND OMINOUS POWER!**

Call Toll Free: 1-800-738-9111

**INTRODUCTORY OFFER: $189.00** (All major credit cards accepted.)

Price includes shipment via UPS to anywhere in the United States, Canada, or Mexico. Frame is 100% filament wound graphite—stronger than steel! Comes strung with top quality string, grommet strip, and bumper guard; grip wrapped in best padded synthetic material available.

American Racquetball Racquet™ complies with AARA racquet specification rules. Sporting goods marketing firms may contact American Sports Racquets Corporation to request information about patent licensing or franchise contracts by faxing 415-364-1559.
YOU DON'T NEED
A BODY BUILDER
TO BUILD AN ATTACK.
POWER IS MORE
A STATE OF MIND
THAN A STATE
OF BODY.
LET IT FLOW.
THE NEW
ARC2 CATALYST™
IS THE RIGHT TOOL.
IF YOU WANT THE
POWER, TAKE IT
IN YOUR HANDS
(WITH THE NEW VISION GRIP™).

Benetton Sportsystem includes Asolo®, Ektelon®, Kästle®, Killer Loop®, Langers®, Nature Project®, Niro®, Nordica®, Prince® and Rollerblade®.
